INDEX TO VOLUME 21

INDEX TO VOLUME 21

AUTHOR INDEX

In addition to the regular issues of *Cancer Research*, the following supplements were published during 1961:

Vol. 21, No. 3, Part 2, Cancer Chemotherapy Screening Data IX, pages 1–160.
Vol. 21, No. 6, Part 2, Cancer Chemotherapy Screening Data X, pages 161–342.
Vol. 21, No. 8, Part 2, Cancer Chemotherapy Screening Data XI, pages 343–616.
Vol. 21, No. 10, Part 2, Cancer Chemotherapy Screening Data XII, pages 617–838.

Each of these supplements is indexed, and a cumulative index is found in No. 10, Part 2. The articles appearing in those supplements are listed in this index *by author only*, and such entries are indicated by "CS" preceding the number—e.g., CS 15.

Abbott, B. J. *See* Leiter, J., CS 93

Abell, C. W. *See* Davenport, G. R., 599

Abraham, S., Chaikoff, I. L., and Cady, P. A comparison of glucose utilization by mouse liver and by the transplantable hepatocarcinoma C_{254}, 938

Adamson, R. H., and Fouts, J. R. The metabolism of drugs by hepatic tumors, 667

Adebonojo, F. O., Bensch, K. G., and King, D. W. The effect of nitrogen on the enzymatic pattern of Strain L cells, 252

Agostino, D. *See* Cliffton, E. E., 1062

Aisenberg, A. C. Studies on normal and neoplastic mitochondria. I. Respiration, 295
——. Studies on normal and neoplastic mitochondria. II. Phosphorylation, 304
——. Relation of energy processes to deoxyribonucleic acid synthesis in tissue slices, 1560

Alexander, J. A. *See* Wheeler, G. P., 390
——. *See* Wheeler, G. P., 399
——. *See* Wheeler, G. P., 407

Amos, D. B. Discussion following Dr. Witebsky's paper, 1223
——. Discussion following paper by Drs. Rapport and Graf, 1238
——. Discussion following papers by Drs. Rubin and Heidelberger, 1258

Anderson, D. G. *See* Kirsten, W. H., 767

Angers, J. *See* Rottino, A., 1445

Anido, P. *See* Merker, P. C., 869

Argus, M. F. *See* Malejka, D., 673

Argyris, B. F., and Argyris, T. S. Mechanism of mammary duct stimulation by tumor transplants, 75

Argyris, T. S. *See* Argyris, B. F., 75

Arnold, M., and Sasse, D. Quantitative and histochemical analysis of Cu, Zn, and Fe in spontaneous and induced primary tumors of rats, 761

Ashmore, J. *See* Weber, G., 1406

Assimacoupoulos, C. *See* Rosenberg, J. C., 627

Avery, P. *See* Goldie, H., 1113

Babbott, D. *See* LaMotta, R. V., 749

Babcock, V. I., and Southam, C. M. Transplantable renal tumor of the rat, 130

Bairati, A., Jr. Submicroscopic structure of Yoshida ascites hepatoma, 989

Baird, G. M. *See* Pradhan, S. N., 984

Baltrus, B. M., and Melchior, J. B. Effects of administration of estrogens upon enzymes of rat pituitary. II. Aconitase, succinoxidase, and transaminase, 1360

Banerjee, G. *See* Weber, G., 933

Bang, F. B. Summary of informal discussion, first session, symposium on the possible role of immunology in cancer, 1184

Barton, A. A. The ultrastructure of the nuclear envelope as seen in replicas from normal and neoplastic nuclei, 198

Baserga, R. *See* Estensen, R., 799

Bates, L. A. *See* Tarnowski, G. S., CS 377

Beiser, S. M. *See* Cohen, S., 1510

Bellin, J. S., Mohos, S. C., and Oster, G. Dye-senstized photoinactivation of tumor cells *in vitro*, 1365

Benacerraf, B. *See* Old, L. J., 1281

Bensch, K. G. *See* Adebonojo, F. O., 252

Bernecky, J. *See* Hiramoto, R., 383
——. *See* Hiramoto, R., 1372

Bertalanffy, F. D. Diagnostic reliability of the acridine orange fluorescence microscope method for cytodiagnosis of cancer, 422

SUBJECT INDEX

AAF. *See* 2-Acetylaminofluorene.

Acetanilide, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

4-Acetylaminobiphenyl, *N*-hydroxylation of, by rat and dog, and carcinogenicity of resultant product. Miller, Wyatt, Miller, and Hartmann, 1465

2-Acetylaminofluorene, carcinogenic activity of metabolite of, in rat. Miller, Miller, and Hartmann, 815

——, chromatographic separation of urinary metabolites of. Weisburger, Grantham, Morris, and Weisburger, 949

——, rat hepatoma induced by, not stained by fluorescein-labeled antibody to rat liver microsomes. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372

Acid phosphatase, in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

Aconitase, in rat pituitary, effects of estrogens on. Baltrus and Melchior, 1360

Acridine orange, in fluorescence microscope method for cytodiagnosis of cancer. Bertalanffy, 422

N-(Acrylamidomethyl)-3-bromopropionamide, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Actidione, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Actinomycin D, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323

——, effect on mouse lung metastases following intravenous injection of tumor cells. Kondo and Moore, 1396

——, electron microscopy of HeLa cell lines sensitive and resistant to. Journey and Goldstein, 929

——, response of normal and tumorous human tissues to, in culture. Cobb, Walker, and Wright, 583

——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Adenine, incorporation into protein of L-1 mouse tumor inhibited by thioTEPA. Pradhan, West, Baird, and Steward, 984

——, metabolism in human leukocytes *in vitro*. Shapira, Bornstein, Wells, and Winzler, 865

Adenine-C^{14}, effects of 4-aminopyrazolo(3,4-*d*)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-*d*)pyrimidine on incorporation of, into nucleic acids of ascites tumors. Henderson and Junga, 173

——, incorporation into nucleic acids of mouse leukemia. Trams, Nadkarni, and Smith, 567

Adenine-8-C^{14}, anabolism and catabolism of, by minced neoplasms and minced tissues of rats and mice. Wheeler and Alexander, 399

——, metabolism in various rat and mouse tissues *in vivo*. Wheeler and Alexander, 390

Adenine analogs, effects on nucleic acid purine metabolism in ascites tumors. Henderson and Junga, 173

Adenocarcinoma. *See also* Mammary adenocarcinoma.

——, spontaneous, nonspecificity of hexokinase for glucose in preparations from. Lange and Kohn, 1055

Adenocarcinoma 72j, mammary, damage to, compared with that to bone marrow, in chemotherapy studies on mice. Vogel, 636

——, tumor-marrow index for. Vogel, 1450

Adenocarcinoma 755, ascites, effect of purinethiol derivatives on mice *in vivo*. LePage and Jones, 642

——, ascites cells, effect of synthetic estrogens on respiration of *in vitro*. Dietrich and Friedland, 502

——, effect of caloric restriction on growth of, in mice. Laster, Schabel, Skipper, Wilcox, and Thomson, 895

——, effect of 6-thioguanine on survival of mice bearing. LePage and Jones, 1590

——, effect of various hormones and aminonicotinamide on enzyme systems of. Dietrich and Martin, 361

——, incorporation of 6-mercaptopurine-S^{35} into nucleic acids of sublines of. Bieber, Dietrich, Elion, Hitchings, and Martin, 228

——, lack of effect of mixed bacterial toxins on, in mouse. Havas and Donnelly, 17

——, large-scale chemotherapy screening against, in tissue culture. Toplin, 1042

——, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399

——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118

——, mouse, purine metabolism *in vivo* in. Wheeler and Alexander, 390

——, mouse, sonicates of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407

——, reproducibility of tumor system employed in CCNSC program, with mice bearing. Schabel, Skipper, White, and Laster, 700

——, test system for quantitative therapeutic evaluation of purine analogs as anticancer agents. Schabel, Montgomery, Skipper, Laster, and Thomson, 690

Adenocarcinoma E 0771, mouse, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412

——, mouse, transplantability after frozen storage. Sugiura, 496

Adenosine deaminase, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232

Adenosine-5′-phosphatase, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232

Adenosine triphosphatase, activity of, in nuclei and mitochondria from mouse mammary adenocarcinoma. Miller and Goldfeder, 64

Adhesiveness, and stickiness, of cell surface of rabbit epiderm and V_2 carcinoma. Coman, 1436

Adjuvant, Freund's, lack of effect on tumor development in mice. Hirsch and Iversen, 752

Adrenal, adenine nucleotide-metabolizing enzymes, effect of Sarcoma 180 on. Hilf, Breuer, and Borman, 1439

——, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673

——, tumors of, in ovariectomized mice, role of gonadotrophin in. Tullos, Kirschbaum, and Trentin, 730

Adrenalectomy, effect on tyrosine α-ketoglutarate transaminase activity of Hepatoma 5123, in rat. Pitot and Morris, 1009

——, of rats bearing Hepatoma 5123, effect on threonine and serine dehydrase of liver and hepatoma. Pitot, Potter, and Morris, 1001

——, pituitary tumor formation reduced by, in rodents given x-radiation. Yokoro, Furth, and Haran-Ghera, 178

Aerobiosis, and anaerobiosis, and DNA synthesis in tissue slices. Aisenberg, 1560

Agar plate assay, drug sensitivity variations among five mammalian cell lines in. Schuurmans, Duncan, and Olson, 773

Age, of host, effect on incidence of blood-borne metastases, in mice. Estensen and Baserga, 799

Agglutination reactions, mixed, in normal and malignant cells. Coombs, 1198

AKR leukemia. *See* Leukemia AKR.

Alanine-α-ketoglutarate transaminase, activity and growth of

Walker tumor with cortisol. Rosen, Budnick, Solomon, and Nichol, 620

Albumin, radioactive, metabolism in tumor-bearing rats Busch, Fujiwara, and Firszt, 371

——, serum, radio-iodinated, in rat liver and hepatoma slices, compared with sucrose and inulin. Humphrey, 1573

Aldolase, activity of Strain L cells increased in anaerobiosis· Adebonojo, Bensch, and King, 252

Alkaloid, vincaleukoblastine, effect on dividing cells *in vivo*. Cutts, 168

Alkylating agents. *See also* specific alkylating agents.

——, chemical and metabolic studies of chloroquine mustard in mice. Rutman, Steele, and Price, 1124

——, effects of cytoxan on H.S. #1 and H.Ep. #3 in rat. Teller and Woolley, 881

——, effects of nitrogen mustard, Myleran, and x-radiation on nucleic acid biosynthesis in mouse ascites tumors. Trams, Nadkarni, and Smith, 567

——, interaction with nucleic acids of regenerating liver and mouse ascites tumors. Trams, Nadkarni, and Smith, 560

——, reactions of chloroquine mustard and nitrogen mustard with Ehrlich cells. Rutman, Steele, and Price, 1134

——, response of normal and tumorous human tissues to, in culture. Cobb, Walker, and Wright, 583

——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Alkylating metabolites, as antitumor compounds. Larionov, 99

American Association for Cancer Research, *historical review* Triolo and Riegel, 137

——, postscripts to history of. Triolo and Riegel, 1595

American Cancer Society. Symposium on possible role of immunology in cancer, 1165

Amethopterin, alone or with 5-bromouridine, effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377

——, and derivatives, tumor and marrow damage from, in mice bearing 6C3HED lymphosarcoma. Vogel, 743

——, effect on virus-induced mouse leukemia. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803

——, in treatment of L1210 leukemia, in mouse, effectiveness depends on time of administration and site of cells. Skipper, Schabel, Trader, and Thomson, 1154

——, lack of cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323

——, response of normal and tumorous human tissues to, in culture. Cobb, Walker, and Wright, 583

——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Amino acids. *See also* specific amino acids.

——, free and bound, effect of polylysine on release of, from Ehrlich ascites tumor cells. Kornguth and Stahmann, 907

——, in toxohormone preparation from human malignant tissues. Yunoki and Griffin, 537

——, metabolism of, in Walker carcinoma 256 cell cultures. Green and Miller, 1034

——, peptides, amides, and esters of chloroethylamino derivatives of, as antitumor compounds. Larinov, 99

***o*-Aminoazotoluene,** urinary bladder and liver tumors induced in hamsters with. Tomatis, Della Porta, and Shubik, 1513

α-Aminoleuvulinic acid dehydrase, activity, relation to liver heme synthesis. Origenes, Lester, and Labbe, 1430

2-Amino-6-mercapto-9β-D-ribofuranosylpurine. *See* Thioguanosine.

6-Aminonicotinamide, antagonism of DPN-dependent enzymatic systems by, augmented by diethylstilbesterol. Dietrich and Martin, 361

——, clinical experience with. Herter, Weissman, Thompson, Hyman, and Martin, 31

Aminopterin, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

4-Aminopyrazolo(3,4-*d*)pyrimidine, effect on nucleic acid purine metabolism in ascites tumors. Henderson and Junga, 173

——, metabolism of, in normal and neoplastic tissues in mouse. Henderson and Junga, 118

Aminopyrine, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Amnion cells, primary human, micromorphology of cultures of, following high hydrostatic pressure. Landau and McAlear, 812

Anaerobiosis, effect on enzymatic pattern of Strain L cells. Adebonojo, Bensch, and King, 252

Andervont ascites tumor, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48

Andervont, hepatoma, mouse, transplantability after frozen storage. Sugiura, 496

Animal cancer, transplantable, as primary standard, *guest editorial*. Potter, 1331

Anthracene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

——, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

Antibiotics. *See also* specific antibiotics.

——, electron microscopy of HeLa cell lines sensitive and resistant to actinomycin D. Journey and Goldstein, 929

——, response of normal and tumorous human tissues to actinomycin D, in culture. Cobb, Walker, and Wright, 583

——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Antibiodies, fluorescein-labeled, to serum proteins, and uptake of serum proteins by neoplastic liver cells. Cohen, Beiser, and Hsu, 1510

——, fluorescent, antigen of bovine cutaneous papilloma detected by. Smithies and Olson, 1557

Antifolics, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Antigens, specific, detected in bovine cutaneous papilloma by fluorescent-labeled antiserum. Smithies and Olson, 1557

——, cancer, specificity of, symposium on immunology and cancer. Rapport and Graf, 1225

Antimetabolites, response of normal and tumorous human tissue to methotrexate, in culture. Cobb, Walker, and Wright, 583

——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Antitumor agents. *See* Chemotherapy.

Aromatic hydrocarbons, polynuclear, electronic structure and carcinogenic effect of. Koutecký and Zahradník, 457

Ascites tumor cells, purinethiols as feedback inhibitors of purine synthesis in. LePage and Jones, 642

Ascites tumors. *See also* specific tumors.

——, mouse, ribonucleases of. Colter, Kuhn, and Ellem, 48

D-Asparagine, cannot substitute for L-asparagine requirement of mouse leukemia L5178Y in culture. Haley, Fischer, and Welch, 532

L-Asparagine, requirement for, of mouse leukemia cells L5178Y in culture. Haley, Fischer, and Welch, 532

L-Aspartic acid, cannot substitute for L-asparagine requirement of mouse leukemia L5178Y in culture. Haley, Fischer, and Welch, 532

Aspartic acid-C^{14}, incorporation into nucleic acids of mouse leukemia. Trams, Nadkarni, and Smith, 567

ATPase activity, adrenal, increased by Sarcoma 180. Hilf, Breuer, and Borman, 1439

——, in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232
——, liver, unchanged by tumor growth. Hilf, Breuer, and Borman, 1439

Autoantibody formation, and self-recognition by host, in cancer. Witebsky, 1216

8-Azaguanine, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690

Azaserine, alone or with thioguanine, effect on Ehrlich ascites tumor-bearing mice. LePage and Jones, 1590
——, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323
——, effect alone and with purinethiols on ascites tumor cells *in vivo*. LePage and Jones, 642
——, ineffective against leukemia L1210 when cells inoculated into brain. Skipper, Schabel, Trader, and Thomson, 1154
——, tested for effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377

6-Azauridine, effect on human pyrimidine metabolism. Cardoso, Calabresi, and Handschumacher, 1551
——, pyrimidine metabolism in leukemic cells resistant to. Pasternak, Fischer, and Handschumacher, 110
——, review on metabolic approaches to chemotherapy. Welch, 1475

Babcock kidney tumor, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412

Bacterial toxins, mixed, in treatment of induced, spontaneous, and transplanted mouse tumors. Havas and Donnelly, 17

Bashford carcinoma 63, mouse, effect of Cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, mouse, transplantability after frozen storage. Sugiura, 496

Benz[*a*]acridine, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

Benz[*c*]acridine, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

Benz[*a*]anthracene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

1H-Benzotriazole, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Benzo[*a*]pyrene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510
——, levels in mammary and fat tissues, in rat, after feeding of. Bock and Dao, 1024

3,4-Benzpyrene, histochemical analysis of heavy metals in rat tumors induced with. Arnold and Sasse, 761

6(Benzylthio)purine, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690

Bicarbonate, required for growth of Jensen and JA sarcomas *in vitro*. McCoy, Maxwell, and Kruse, 997

Binding, of chloroquine mustard to nucleic acids and protein, in vitro. Rutman, Steele, and Price, 1124
——, of hydrocarbons to mouse skin proteins, fractionation of latter. Davenport, Abell, and Heidelberger, 599
——, of hydrocarbons to skin protein, zero-time studies. Somerville and Heidelberger, 591
——, of thymidine and bromodeoxyuridine to DNA of mammalian cells *in vitro*. Kriss and Révész, 1141

Birds, captive wild, hepatitis, cirrhosis, and hepatoma in. Ratcliffe, 26
——, pulmonary neoplasms produced by methylcholanthrene in white Pekin ducks. Rigdon, 571

Bis(β-chloroethyl)amine, not a major urinary metabolite after injection of cyclophosphamide. Philips, Sternberg, Cronin, and Vidal, 1577

Bis(β-chloroethyl)-*p*-aminophenylbutyric acid. *See* Chlorambucil.

Bladder, urinary, tumor induced in hamsters with *o*-aminoazotoluene. Tomatis, Della Porta, and Shubik, 1513

Blastomyces dermatitidis, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

Blood, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673
——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118
——, rat and mouse, purine metabolism *in vivo* in. Wheeler and Alexander, 390

Blood counts, during irradiation-induced leukemia and inhibition by testosterone, in mice. Wasi and Block, 463

Blue nevi, human, hamster melanotic tumor resembling. Rappaport, Pietra, and Shubik, 661

Body weight change, by normal and tumor-bearing rats. Rechcigl, Grantham, and Greenfield, 238

Bone marrow, damage compared with that to tumor tissue, in chemotherapy studies on mice. Vogel, 636
——, damage from methotrexate and derivatives, in tumor-bearing mice. Vogel, 743
——, incorporation of thymidine into DNA in, and effect of 5-fluorouracil. Field, Kriss, and Tung, 2
——, *in vivo* chromosome constitution of human, leukemic and nonleukemic. Sandberg, Ishihara, Miwa, and Hauschka, 678
——, iron utilized for heme synthesis related to amount of iron taken up *in vivo*. Origenes, Lester, and Labbe, 1430
——, normal, stathmokinetic effect of vincaleukoblastine on, in mice. Cardinali, Cardinali, and Blair, 1542
——, rat, incorporation of thymidine and 5-bromodeoxyuridine into DNA of, *in vitro*, Kriss and Révész, 1141
——, rat, normal, effect of vincaleukoblastine on mitosis in. Cutts, 168

Bordetella pertussis, inhibits transplantation of Sarcoma 180 in mouse. Malkiel and Hargis, 1461

Bovine cutaneous papilloma, antigen of, detected by fluorescent antibodies. Smithies and Olson, 1557

Brain, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399

Brain tumors, mouse, localization of octoiodofluorescein-I^{131} in. Tocus and Okita, 201

3′-Bromo-5′-chloromethotrexate, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Bromodeoxyuridine-Br^{82}, synthesis of. Kriss and Révész, 1141

Bromodeoxyuridine-H^3, incorporation into DNA of mammalian cells *in vitro*. Kriss and Révész, 1141
——, synthesis of. Kriss and Révész, 1141

3′-Bromomethotrexate, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

5-Bromouridine, alone or with amethopterin, effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377

Brown-Pearce carcinoma, passage of cells of, through capillaries in rabbits. Zeidman, 38

Buffers, effect on glycine incorporation by mouse tumor slices. Ellis and Scholefield, 650

9-Butyl thioguanine, lack of feedback inhibition of purine synthesis in ascites tumor cells *in vivo* by. LePage and Jones, 642
——, with azaserine, effect on Ehrlich ascites tumor-bearing mice. LePage and Jones, 1590

6C3HED tumor. *See* Lymphosarcoma 6C3HED Gardner.

Cancer, animal, the primary tool, *guest editorial*. Day, 581
——, animal and human, drug response between, symposium paper. Skipper, 1100
——, autochthonous, immunology of, evaluation of procedures. Osler, 1187
——, chemotherapy and chemopraxis of, symposium paper. Holland, 1086

Cancer—*Continued*
——, chromosomes in development and. Hauschka, 957
——, diagnostic reliability of acridine orange fluorescence microscope method for. Bertalanffy, 422
——, epidemiology of. Wynder, 858
——, host reaction to own cancer cells. Kidd, 1170
——, immunological investigations on, *review*. Milgrom, 862
——, immunological technics applied to. Furth, 1209
——, lung, patterns of metastasis in, *review*. Onuigbo, 1077
——, possible role of immunology in, symposium. American Cancer Society, 1165
——, survival time analysis in cancer therapy. Kodlin, 1103
——, transplantable animal, primary standard, *guest editorial*. Potter, 1331

Candida albicans, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

Carbamyl phosphate-aspartate transcarbamylase, in Ehrlich ascites cells, inhibited by pyrimidine derivatives. Bresnick and Hitchings, 105

Carbohydrate metabolism, in mouse liver and hepatocarcinoma C_{234}. Abraham, Chaikoff, and Cady, 938

Carbon dioxide metabolism, in Jensen and JA sarcomas *in vitro*. McCoy, Maxwell, and Kruse, 997

6-Carboxymethylcellulose, injected into tumor-bearing mice, concentrations of enzymes, nitrogen, and DNA. Fodor, Clarke, and Bodansky, 232

Carcinogen, urinary metabolites of *N*-2-fluorenylacetamide. Weisburger, Grantham, Morris, and Weisburger, 949

Carcinogenesis, and underfeeding, in rats and mice. White, 281
——, chemical, effect of repeated surgical trauma on, in mice. Gottfried, Molomut, and Patti, 658
——, concentration of hydrocarbons in mouse skin after cutaneous application. Bock and Burnham, 510
——, dose-response relation in radiation-induced cancer, in human. Upton, 717
——, effect of castration on, in hamster. Fortner, 1491
——, effects of powdered polymer in induction of, in rat. Oppenheimer, Willhite, Danishefsky, and Stout, 132
——, environmental, and cancers. Hueper, 842
——, epidermal, induced by methylcholanthrene, and changes in hydroxyproline and tyrosine. Fels and Greco, 40
——, fractionation of mouse skin proteins to which hydrocarbons are bound. Davenport, Abell, and Heidelberger, 599
——, hazard from food additives, evaluation of. Subcommittee on Carcinogenesis, 429
——, induced in rat liver, effect on 5-hydroxytryptophan decarboxylase and serotonin deaminase. Kizer and Chan, 489
——, influence of stilbestrol on mouse skin tumors induced with tobacco tar and methylcholanthrene. Svoboda, 993
——, influence of urethan on spontaneous leukemia in mice. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71
——, in hamster cheek pouch, soluble sulfhydryl groups. Morris, Scott, and Rieskin, 1352
——, interaction of hydrocarbons with tissues, zero-time binding to proteins. Somerville and Heidelberger, 591
——, in transplantable animal cancer, *guest editorial*. Potter, 1331
——, mammary, in mice, effects of pituitary isograft on. Liebelt and Liebelt, 86
——, melanotic tumors induced in white hamsters by dimethylbenzanthracene. Rappaport, Pietra, and Shubik, 661
——, multipotential, with urethan in hamster. Toth, Tomatis, and Shubik, 1537
——, of skin, induced by methylcholanthrene, lipide composition of epidermis and dermis, in mice. Carruthers and Davis, 82
——, pulmonary neoplasms in white Pekin ducks by methylcholanthrene. Rigdon, 571
——, tumor induction in hamsters with oral 20-methylcholanthrene. Della Porta, 575
——, tumor promotion by Euphorbia latices. Roe and Peirce, 338
——, viral, symposium paper. Dulbecco, 975
——, virus, cell differentiation as determinant of suceptibility to, symposium paper. Kaplan, 981

Carcinogenic agents, and electronic structure of DNA. Hoffmann and Ladik, 474

Carcinogenic effect, of polynuclear aromatic hydrocarbons, and their electronic structure. Koutecký and Zahradník, 457

Carcinogenicity, of *N*-hydroxy-4-acetylaminobiphenyl in the rat. Miller, Wyatt, Miller, and Hartmann, 1465
——, of 3-methoxy-4-aminoazobenzene and *N*-methyl derivatives, for extrahepatic rat tissues. Miller and Miller, 1068

Carcinoma. *See also* Mammary carcinoma.

Carcinoma 755. *See* Adenocarcinoma 755.

Carcinoma 1025, antitumor activity of cytoxan against, in mouse. Sugiura, Schmid, and Schmid, 1412
——, mouse, transplantability after frozen storage. Sugiura, 496

Carcinomas, mouse skin, induced by benzpyrene, irradiation of and sulfur-35 uptake. Duhig, 485

Carcinosarcoma 256 Walker. *See* Walker carcinosarcoma 256.

Carcinostatic agents, effect on production of metastases in mice. Kondo and Moore, 1396

Carzinophilin, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Castration, effect on level of polynuclear hydrocarbons in rat mammary glands after oral administration. Bock and Dao, 1024
——, effect on spontaneous tumorigenesis in hamster. Fortner, 1491

Catalase activity, liver, not affected by injections of iron. Origenes, Lester, and Labbe, 1430

Cathepsin, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232

Cathepic activity, released from ascites tumor cells *in vitro*. Holmberg, 1386

Cell differentiation, as determinant of susceptibility to virus carcinogenesis. Kaplan, 981

Cell division. *See* Mitosis.

Cell fractionation, adenosine triphosphatase activity of cell fractions from mouse mammary adenocarcinoma. Miller and Goldfeder, 64
——, phosphorylation in mitochondria and homogenates of normal and neoplastic rat tissues. Aisenberg, 304
——, respiration in normal and neoplastic mitochondria, in rat. Aisenberg, 295
——, specific activities of tumor proteins following injection of labeled albumin. Busch, Fujiwara, and Firszt, 371

Cell lines, cultured, transplantation into animals. Manuelidis, 876

Cell proliferation, relation to fibrogenesis, in rat liver. Hutterer, Rubin, Singer, and Popper, 206

Cells, normal, human mitochondrial characteristics of. Mukherjee, De, and Mitra, 314

Cell strains, permanent, Ehrlich ascites and TA_3 established as. Guerin and Morgan, 378

Cell surface, adhesiveness and stickiness of rabbit epiderm and V_2 carcinoma. Coman, 1436

Cell suspensions, of tumors, enzymatically prepared, freeze-preservation of. Vaitkevicius, Simpson, and Brennan, 187

Charter members, American Association for Cancer Research. Triolo and Riegel, 137

Chemotherapy. *See also* Supplements on Cancer Chemotherapy Screening Data IX, X, XI, and XII.
——, and chemopraxis of cancer, symposium paper. Holland, 1086
——, antitumor activity of cytoxan in 26 out of 33 tumors. Sugiura, Schmid, and Schmid, 1412
——, antitumor effect of cucurbitacins in mice *in vivo*. Gitter, Gallily, Shohat, and Lavie, 516

——, response of virus-induced murine lymphoid leukemia to drug therapy. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803
——, stathmokinetic effect of vincaleukoblastine on normal bone marrow and leukemic cells, in mice. Cardinali, Cardinali, and Blair, 1542
——, steroid therapy of mice bearing H.Ep. #3, nonspecific antitumor effect. Merker, Anido, and Mantel, 869
——, survival time analysis for treatment evaluation in. Kodlin, 1103
——, therapeutic evaluation of purine analogs, in mice bearing Carcinoma 755. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
——, tissue culture system in large-scale screening. Toplin, 1042
——, tumor and marrow damage in tumor-bearing mice with methotrexate and derivatives. Vogel, 743
——, variations in drug sensitivity among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Chicken tumors, frozen storage of. Sugiura, 496
——, Rous sarcoma, lack of effect of mixed bacterial toxins on. Havas and Donnelly, 17

Chlorambucil, incorporation into DNA of regenerating liver and mouse ascites tumors. Trams, Nadkarni, and Smith, 560
——, response of normal and tumorous human tissues to, in culture. Cobb, Walker, and Wright, 583

6-Chloro-2,8-dihydroxypurine. *See* 6-Chlorouric acid.

Chloroethylamino derivatives, of amino acids and phenylalkancarboxylic acids, as antitumor compounds. Larionov, 99

***p*-Chloromercuribenzoate,** effect on ribonuclease activity of mouse ascites tumors. Colter, Kuhn, and Ellem, 48

3′-Chloromethotrexate, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

6-Chloropurine, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
——, inhibition of xanthine oxidase by, in rat liver *in vitro*. Duggan, Weigert, and Titus, 1047

Chloroquine mustard, chemical and metabolic studies of, in mice. Rutman, Steele, and Price, 1124
——, reactions with Ehrlich cells. Rutman, Steele, and Price, 1134

6-Chlorouric acid, inhibition of uricase by, in rat liver *in vitro*. Duggan, Weigert, and Titus, 1047

Chloropromazine, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Cholesterol, in epidermis and dermis of mice during carcinogenesis by methylcholanthrene. Carruthers and Davis, 82

Cholinesterase, reduced serum activity in guinea pig with locally implanted human tumor. LaMotta, Babbott, and Wetstone, 749

Choriocarcinoma, human, estradiol-17β enzyme systems of. Kellogg, 319

Chorionic gonadotropin, secreted by human embryonal carcinoma, effect of colchicine and x-radiation. Midgley and Pierce, 545

Chromatographic separation, of nucleic acids from isologous newborn, adult, and neoplastic thymus. Smith and Kaplan, 1148

Chromatography, of urinary metabolites of *N*-2-fluorenylacetamide. Weisburger, Grantham, Morris, and Weisburger, 949

Chromosomes, constitution of, in bone marrow of leukemic and nonleukemic humans. Sandberg, Ishihara, Miwa, and Hauschka, 678
——, in ontogeny and oncogeny. Hauschka, 957
——, number of, of Krebs-2 ascites carcinoma cultured *in vivo* and *in vitro*. Ely and Gray, 1020
——, variation in cells derived from pig kidney, *in vitro*. Ruddle, 885

Cirrhosis, incidence in birds in zoological gardens in Philadelphia. Ratcliffe, 26

Cloudman melanoma S-91, CCRF cell line of, effect of Cytoxan on culture of. Foley, Friedman, and Drolet, 57
——, mouse, efficacy of phenylalanine mustards against. Luck, 262

Codeine, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Colchicine, effect on differentiation of human embryonal carcinoma. Midgley and Pierce, 545

Colchicine—*Continued*
——, influence on leukemogenic effect in mice. Kawamoto, Kirschbaum, Trentin, and Taylor, 309

Collagen, formation of, in rat liver, relation of cell proliferation and fibrogenesis. Hutterer, Rubin, Singer, and Popper, 206
——, in relation to studies on induced epidermal carcinogenesis, in mouse. Fels and Greco, 40

Connective tissue, normal, quantitative and histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761

Copper, histochemical analysis of, in spontaneous and induced primary tumors in rats. Arnold and Sasse, 761

Cordycepin, growth of Ehrlich ascites tumor inhibited by. Jagger, Kredich, and Guarino, 216

Cordyceps militaris, Ehrlich ascites tumor inhibited by nucleoside from mold of, called cordycepin. Jagger, Kredich, and Guarino, 216

Corticoids, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

Corticosteroids, effect of cortisol on growth and transaminase activity of Walker tumor. Rosen, Budnick, Solomon, and Nichol, 620
——, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221

Cortisol, effect on growth and transaminase activity of Walker tumor. Rosen, Budnick, Solomon, and Nichol, 620
——, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

Cortisol acetate, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

Cortisone, effect of administration of, on tryptophan pyrrolase in rat liver and Hepatoma 5123. Pitot and Morris, 1009
——, effect of administration of, on tyrosine α-ketoglutarate transaminase in rat liver and Hepatoma 5123. Pitot and Morris, 1009
——, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221
——, effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673

Cortisone acetate, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

Cottonseed oil, in inducing experimental subcutaneous cavity of scalp of mouse. Goldie, Walker, Avery, Houston, and McIver, 1113

Crabb hamster sarcoma, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, transplantability after frozen storage. Sugiura, 496

Crabtree effect, *review*. Ibsen, 829

Cucurbitacins, antitumor effect, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Culture. *See also* Tissue culture.
——, cell, amino acid and protein metabolism of, of Walker tumor 256. Green and Miller, 1034

Culture medium, effect on chromosome number of Krebs-2 ascites carcinoma. Ely and Gray, 1020

6(Cyanomethylthio)purine, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690

Cyclophosphamide, and urinary bladder toxicity in rats and dogs. Philips, Sternberg, Cronin, and Vidal, 1577
——, antitumor activity in 26 out of 33 tumors. Sugiura, Schmid, and Schmid, 1412
——, biochemical and morphologic changes in mast-cell neoplasm with, in mice. Mengel and Kelly, 1545
——, effect on virus-induced mouse leukemia and transplantable leukemia. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803
——, effects on H.S. #1 and H.Ep. #3 in the rat. Teller and Woolley, 881
——, evidence of activation *in vivo* and *in vitro*. Foley, Friedman, and Drolet, 57
——, ineffective against leukemia L1210 when cells inoculated into brain. Skipper, Schabel, Trader, and Thomson, 1154
——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Cytochrome oxidase, activity of Strain L cells decreased in anaerobiosis. Adebonojo, Bensch, and King, 252
——, little activity in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

Cytocidal effectiveness, of various tumor-inhibitory agents, on Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323

Cytodiagnosis, of cancer, with the acridine orange fluorescence microscope method. Bertalanffy, 422

Cytolipin G, in tumors and tissues of gastrointestinal tract, in human. Graf, Rapport, and Brandt, 1532

Cytology, fine, of Walker carcinosarcoma 256, in rat. Mercer and Easty, 52
——, of human melanoma cells in tissue culture, with phase contrast microscopy. Rose, 706

Cytoxan. *See* Cyclophosphamide.

DAB. *See* *p*-Dimethylaminoazobenzene.

DBA. *See* 1,2,5,6-Dibenzanthracene.

DBA ascites lymphoma, immunological depression of growth of, in mice. Wigzell, 365

Deac 3 tumor, carried in hamster, effect of colchicine and x-radiation on differentiation of. Midgley and Pierce, 545

Decadron, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

Decanoate, as uncoupling agent, effect on glycine uptake by mouse tumors. Ellis and Scholefield, 650

Dehydrogenase, DPN- and TPN-linked, activity in human choriocarcinoma homogenates. Kellogg, 319

Deoxycytidylate deaminase, in normal and neoplastic rat liver. Maley and Maley, 1421

Deoxyribonucleic acid. *See also* Nucleic acids.
——, concentration in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232
——, electronic structure of, and carcinogenic agents. Hofmann and Ladik, 474
——, incorporation of thymidine and 5-bromodeoxyuridine into, of mammalian cells *in vitro*. Kriss and Révész, 1141
——, in rat liver, relation to fibrogenesis. Hutterer, Rubin, Singer, and Popper, 206
——, interaction of alkylating agents with, in mouse ascites tumors. Trams, Nadkarni, and Smith, 560
——, synthesis of, in tissue slices, relation of energy processes to. Aisenberg, 1560
——, thymidine turnover in, of mouse marrow and intestinal mucosa, and effect of 5-fluorouracil. Field, Kriss, and Tung, 2

5′-Deoxythioguanosine, lack of feedback inhibition of purine synthesis in ascites tumor cells *in vivo* by. LePage and Jones, 642

Dermis, of mice, lipide composition during carcinogenesis. Carruthers and Davis, 82

Dexamethasone, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221

Diabetes, alanine transaminase activity and growth of Walker tumor in rats with. Rosen, Budnick, Solomon, and Nichol, 620

Diagnostic reliability, of acridine orange fluorescence microscope method for cytodiagnosis of cancer. Bertalanffy, 422

2,6-Diaminopurine, effect on metabolism of adenine and guanine in human leukocytes *in vitro*. Shapirh, Bornstein, Wells, and Winzler, 265

Diaphorases, DPN- and TPN-linked, in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

O-Diazo acetyl-L-serine. *See* Azaserine.

6-Diazo-5-o-o-L-norleucine, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323

——, inhibition of biosynthesis of RNA cytosine and RNA purines by, in Novikoff tumor. Moore and Hurlbert, 257

1,2,3,4-Dibenzanthracene, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

1,2,3,4-Dibenzanthracene-9,10-C^{14}, noncarcinogenic, fractionation of skin proteins of mice given. Davenport, Abell, and Heidelberger, 599

1,2,5,6-Dibenzanthracene, derivatives of, zero-time binding to skin proteins of mouse. Somerville and Heidelberger, 591

1,2,5,6-Dibenzanthracene-9,10-C^{14}, carcinogenic, fractionation of skin proteins of mice given. Davenport, Abell, and Heidelberger, 599

1,2,5,6-Dibenzanthracene-3,4-dihydrodiol, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

1,2,5,6-Dibenz-3,4-anthraquinone, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

1,2,5,6-Dibenz-9,10-anthraquinone, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

3,4,9-10-Dibenzpyrene, combined with surgical trauma, mouse carcinogenesis with. Gottfried, Molomut, and Patti, 658

3′,5′-Dibromoaminopterin, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

3′,5′-Dichloroamethopterin, lack of effect on transplantable mouse leukemia. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803

3′,5′-Dichloro-4-amino-4-deoxy-9,10-dimethylpteroylglutamic acid, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

3′,5′-Dichloroaminopterin, effect on bone marrow and tumor tissue of mice treated with, Vogel, 636

——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Dichloromethotrexate, tumor and marrow damage from, in mice bearing 6C3HED lymphosarcoma. Vogel, 743

3′-5′-Dichloromethotrexate, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Dicoumarol, as uncoupling agent, effect on glycine uptake by mouse tumors. Ellis and Scholefield, 650

Dienesterol, effect on respiration of ascites tumor cells *in vitro*. Dietrich and Friedland, 502

Diet, caloric restriction in relation to body weight and antitumor effect in mice. Laster, Schabel, Skipper, Wilcox, and Thomson, 895

——, high-fat, effect on pulmonary metastases of Walker tumor. Cliffton, Agostino, and Minde, 1062

——, high-protein, effect on alanine transaminase activity and growth of Walker tumor. Rosen, Budnick, Solomon, and Nichol, 620

——, underfeeding and tumor formation, transplantation, and growth in rodents. White, 281

Dietary protein, effect on inducible enzymes in rat liver and Hepatoma 5123. Pitot, Potter, and Morris, 1001

Diethylstilbesterol, antagonism of DPN-dependent enzymatic systems by 6-aminonicotinamide, augmented by. Dietrich and Martin, 361

——, effect on pituitary enzymes, in rat. Baltrus and Melchior, 1360

——, effect on respiration of ascites tumor cells *in vitro*. Dietrich and Friedland, 502

Diffusion chambers, growth of L-fibroblasts in, in resistant mice. Gabourel, 506

Difluoromethotrexate, tumor and marrow damage from, in mice bearing 6C3HED lymphosarcoma. Vogel, 743

3′,5′-Difluoromethotrexate, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Dihydroelatericin A, antitumor effect tested, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Dihydroorotase, in Ehrlich ascites cells, inhibited by pyrimidine derivatives. Bresnick and Hitchings, 105

2,8-Dihydroxy-6-chloropurine. *See* 6-Chlorouric acid.

Dimethanesulfonoxybutane. *See* Myleran.

Dimethylaminoazobenzene, histochemical analysis of heavy metals in rat tumors induced with. Arnold and Sasse, 761

——, potassium flux of hepatomas induced by, in rat. Humphrey, 1566

——, rat hepatomas induced with, sucrose and inulin distribution. Humphrey, 1573

——, rat liver tumors induced by, and immunohistochemical study of serum protein uptake by tumor cells. Cohen, Beiser, and Hsu, 1510

4(4′-Dimethylaminostyryl)quinoline, effect on glycolysis of lymphoblasts *in vitro*. Homburg, Bos, deBruyn, and Emmelot, 353

2-(*p*-Dimethylaminostyryl)quinoline methiodide, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

7,9-Dimethylbenz[*c*]acridine, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

7,12-Dimethylbenz[*a*]anthracene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

——, induction of melanotic tumors in hamster induced by. Rappaport, Pietra, and Shubik, 661

——, levels in mammary and fat tissues, in rat, after feeding of. Bock and Dao, 1024

9,10-Dimethyl-1,2-benzanthracene, applied to hamster cheek pouch, histopathology and soluble sulfhydryl groups. Morris, Scott, and Reiskin, 1352

——, pretreatment of mice with, followed by latices of Euphorbia. Roe and Peirce, 338

9,10-Dimethyl-1,2,5,6-dibenzanthracene, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

Dinitrophenol, effect on glycine uptake by mouse tumors. Ellis and Scholefield, 650

——, effect on phosphorylation in mitochondria and homogenates of various rat tissues. Aisenberg, 304

——, and adenosine triphosphatase activity of nuclei and mitochondria from mouse mammary adenocarcinoma. Miller and Goldfeder, 64

——, effect on glycolysis of lymphoblasts *in vitro*. Homburg, Bos, deBruyn, and Emmelot, 353

Directors, American Association for Cancer Research, 1907–1961. Triolo and Riegel, 137

Distribution, of 5-iododeoxyuridine-I^{131} in the mouse and rat. Hampton and Eidinoff, 345

DNA. *See* Deoxyribonucleic acid.

Dogs, cyclophosphamide and urinary bladder toxicity in. Philips, Sternberg, Cronin, and Vidal, 1577

——, prostate tumor of, histochemical analysis of heavy metals in. Arnold and Sasse, 761

DON. *See* 6-Diazo-5-oxo-L-norleucine.

Dopan, as antitumor compound. Larionov, 99

Dose-response relation, in radiation-induced cancer, in human. Upton, 717

DPN-dependent enzymatic systems, antagonism by 6-aminonicotinamide, augmented by diethylstilbesterol. Dietrich and Martin, 361

DPN-linked dehydrogenase, activity in human choriocarcinoma homogenates. Kellogg, 319

Drug sensitivity, variation among five mammalian cell lines in agar plate assay. Schuurmans, Duncan, and Olson, 773

Dry mass, of Ehrlich ascites tumor cells, increased after treatment with nitrogen mustard. Lee, Richards, and Furst, 1108

Ducks, white Pekin, pulmonary neoplasms produced by methylcholanthrene in. Rigdon, 571

Dunning hepatoma, activities of deoxycytidylate deaminase and thymidylate synthetase in. Maley and Maley, 1421

——, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522

Dunning Lymphosarcoma R2788. *See* Lymphosarcoma R2788 Dunning.

Dyes, localization of octoiodofluorescein-I^{131} in mouse brain tumors. Tocus and Okita, 201
——, as photosensitizers of inactivation of tumor cells *in vitro.* Bellin, Mohos, and Oster, 1365

Eagle's KB cells. *See* KB cells.

Ear duct, rat, tumors of, produced by *N*-hydroxy-2-acetylaminofluorene. Miller, Miller, and Hartmann, 815
——, tumors of, induced by ingestion of 3-methoxy-4-aminoazobenzene and derivatives. Miller and Miller, 1068
——, glands, sebaceous tumors of, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 575

Earle's L strain cells. *See* Strain L cells.

EDTA. *See* Ethylenediaminetetraacetate.

Ehrlich ascites cells, Crabtree effect in, *review.* Ibsen, 829
——, dry mass increased after treatment with nitrogen mustard. Lee, Richards, and Furst, 1108
——, dye-sensitized photoinactivation of, *in vitro.* Bellin, Mohos, and Oster, 1365
——, effect of age of host on incidence of metastases from injected, in mice. Estensen and Baserga, 799
——, effects of 4-aminopyrazolo(3,4-*d*)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-*d*)pyrimidine on nucleic acid purine metabolism in. Henderson and Junga, 173
——, effect of anaerobiosis on enzymatic pattern of. Adebonojo, Bensch, and King, 252
——, effect of glucose on glutamine utilization by. Kvamme and Svenneby, 92
——, effect of polylysine on leakage and retention of compounds by. Kornguth and Stahmann, 907
——, effect of purinethiol derivatives on mice *in vivo.* LePage and Jones, 642
——, effect of sarcomycin derivatives on growth of. Caputo, Brunori, and Giuliano, 1499
——, effect of synthetic estrogens on respiration of, *in vitro.* Dietrich and Friedland, 502
——, effect of 6-thioguanine on survival of mice bearing. LePage and Jones, 1590
——, effects on iron incorporation into heme. Origenes, Lester, and Labbe, 1430
——, established as permanent cell strains in tissue culture. Guerin and Morgan, 378
——, feedback control in. Bresnick and Hitchings, 105
——, hexokinase specificity of preparations from. Lange and Kohn, 1055
——, inhibition by cordycepin. Jagger, Kredich, and Guarino, 216
——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118
——, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48
——, reactions of chloroquine mustard and nitrogen mustard with. Rutman, Steele, and Price, 1134
——, subcutaneous transplants of, in mice, mammary duct stimulation by. Argyris and Argyris, 75

Ehrlich carcinoma, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, solid and ascitic, effects of uncoupling agents on glycine uptake by. Ellis and Scholefield, 650
——, solid and ascitic, mouse, transplantability after frozen storage. Sugiura, 496
——, vaccinia hemagglutinin inhibitor in ascites of, in mouse. Wolin, 1030

Ehrlich-Landschütz ascites cells, release of cytoplasmic enzymes from, *in vitro.* Holmberg, 1386

Ehrlich-Lettré ascites cells, antitumor effect of cucurbitacins on, in mice *in vivo.* Gitter, Gallily, Shohat, and Lavie, 516
——, effect of synthetic estrogens on respiration of, *in vitro.* Dietrich and Friedland, 502

Ehrlich TGR ascites cells, thioguanine-resistant, effect of purinethiol derivatives on mice *in vivo.* LePage and Jones, 642

Ehrlich-TG-R cells, mouse, metabolism of 4-aminopyrazolo-(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118

Elatericin A, antitumor effect, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Elatericin B, antitumor effect, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Elaterin, antitumor effect, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Elaterin methylether, antitumor effect tested, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Electronic structure, of DNA, and carcinogenic agents. Hoffmann and Ladik, 474
——, of polynuclear aromatic hydrocarbons, and their carcinogenic effect. Koutecký and Zahradník, 457

Electron microscopy, of FL and primary human amnion cells following high hydrostatic pressure. Landau and McAlear, 812
——, of HeLa cell lines sensitive and resistant to actinomycin D. Journey and Goldstein, 929
——, of isolated liver and tumor nuclei. Barton, 198
——, of L strain cells, virus-like particles in. Dales and Howatson, 193
——, of mitochondrial change in small intestine after 20-methylcholanthrene. Burt, Killmeyer, Thompson, and Grauer, 1427
——, of Walker carcinosarcoma 256, in rat. Mercer and Easty, 52
——, of Walker tumor. Fisher and Fisher, 527
——, of Yoshida ascites hepatoma cells. Bairati, 989

Electrophoresis, of erythrocytes in carcinoma. Rottino and Angers, 1445
——, of serum lactic dehydrogenase, in human. Hill, 271
——, of soluble proteins of mouse skin. Davenport, Abell, and Heidelberger, 599

Embryo, rat, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

Endocrinology, of ovarian tumor formation in parabiotic rats. Johnson and Witschi, 783

Endoxan. *See* Cyclophosphamide.

Environmental carcinogenesis, symposium paper. Hueper, 842

Enzymatic systems, DPN-dependent, antagonism by 6-aminonicotinamide, augmented by diethylstilbesterol. Dietrich and Martin, 361

Enzymes, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232
——, adenosine triphosphatase activity, in nuclei and mitochondria from mouse mammary adenocarcinoma. Miller and Goldfeder, 64
——, carbohydrate, in rat normal liver and hepatoma. Weber, Banerjee, and Morris, 933
——, cytoplasmic, from ascites tumor cells, *in vitro* release of. Holmberg, 1386
——, deoxycytidylate deaminase and thymidylate synthetase in normal and neoplastic rat liver. Maley and Maley, 1421
——, effect of cortisol on growth and transaminase activity of Walker tumor. Rosen, Budnick, Solomon, and Nichol, 620
——, effect of nitrogen on, in Strain L cells. Adebonojo, Bensch, and King, 252
——, electrophoretic fractionation of serum lactic dehydrogenase. Hill, 271
——, feedback control in Ehrlich ascites cells, carbamyl phosphate-aspartate transcarbamylase and dihydroorotase. Bresnick and Hitchings, 105
——, glutamic oxalacetic transaminase activities of liver and other tumors in the rat. Dyer, Gullino, Ensfield, and Morris, 1522
——, hexokinase specificity of some tumor tissue extracts. Lange and Kohn, 1055
——, 5-hydroxytryptophan decarboxylase and serotonin deaminase in transplanted hepatomas and induced rat liver tumor. Kizer and Chan, 489

——, inducible, effect of dietary protein on, in rat liver and Hepatoma 5123. Pitot, Potter, and Morris, 1001
——, in mouse liver and hepatocarcinoma C_{254}, related to carbohydrate metabolism. Abraham, Chaikoff, and Cady, 938
——, in rat pituitary, effects of estrogens on. Baltrus and Melchior, 1360
——, in tryptophan metabolism of tumor-bearing rats. Petasnick, Brown, and Price, 1400
——, loss of activity of, in 4-dimethylaminoazobenzene-induced liver tumors. Adamson and Fouts, 667
——, of rat liver *in vitro*, effects of 6-chloropurine and 6-chlorouric acid on. Duggan, Weigert, and Titus, 1047
——, of Walker carcinoma, studied histochemically. Fisher and Fisher, 527
——, reduced serum cholinesterase activity in guinea pig with locally implanted human tumor. LaMotta, Babbott, and Wetstone, 749
——, ribonucleases of mouse ascites tumors. Colter, Kuhn, and Ellem, 48
——, sensitive to estradiol-17β, of human choriocarcinoma. Kellogg, 319
——, tryptophan pyrrolase and tyrosine α-ketoglutarate transaminase in rat liver and Hepatoma 5123. Pitot and Morris, 1009

Eosin Y, photoinactivation of tumor cells *in vitro* sensitized by. Bellin, Mohos, and Oster, 1365

Epidemiology, of cancer. Wynder, 858

Epidermis, of mice, lipide composition during carcinogenesis. Carruthers and Davis, 82

Erythrocytes, destruction of, by antibody and complement. Mayer, 1262
——, electrophoretic mobility in carcinoma and other diseases. Rottino and Angers, 1445

Esterase, nonspecific, in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

Estradiol-17β, enzyme systems sensitive to, of human choriocarcinoma. Kellogg, 319

Estrogens, effect on pituitary enzymes, in rat. Baltrus and Melchior, 1360
——, effect on respiration of ascites tumor cells *in vitro*. Dietrich and Friedland, 502
——, sensitivity of pituitary mammotropic tumors to. Clifton and Furth, 913
——, with x-rays or urethan, leukemogenic effect of, in mice, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309

Ethionine, subacute intoxication of rats by, and fibrogenesis in the liver. Hutterer, Rubin, Singer, and Popper, 206

Ethyl carbamate. *See* Urethan.

Ethylenediaminetetraacetate, and adenosine triphosphatase activity of nuclei and mitochondria from mouse mammary adenocarcinoma. Miller and Goldfeder, 64

Ethyleneimino-*s*-triazine. *See* Triethylenemelamine.

9-Ethyl-6-mercaptopurine, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690

Euphorbia, tumor promotion by. Roe and Peirce, 338

Eye, guinea pig, with implant of human tumor, depressed serum cholinesterase activity found. LaMotta, Babbott, and Wetstone, 749

Fats. *See* Lipides.

Fatty acids, conversion of glucose carbons to, by mouse liver and hepatocarcinoma C_{254}. Abraham, Chaikoff, and Cady, 938

Feedback control, in Ehrlich ascites cells, pyrimidine synthesis. Bresnick and Hitchings, 105

Fermentation broth filtrates, large-scale chemotherapy screening of, in tissue culture system. Toplin, 1042

Fibroblasts, tissue culture line, transplanted into various mammals. Manuelidis, 876

Fibrogenesis, relation to cell proliferation, in rat liver. Hutterer, Rubin, Singer, and Popper, 206

Fibrosarcomas, induced with 3,4-benzpyrene, histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761

Filipin, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

FL cells. *See* Strain FL cells.

Flexner-Jobling carcinoma, antitumor activity of cytoxan against, in rat. Sugiura, Schmid, and Schmid, 1412
——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat, transplantability after frozen storage. Sugiura, 496
——, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

Fluorene-2,7-di(sulfonamido-2-naphthalene)-S^{35}, in rats and mice. Malejka, Argus, and Ray, 673

N-2-Fluorenylacetamide. *See* 2-Acetylaminofluorene.

Fluorescein dye, localization of octoiodofluorescein-I^{131} in mouse brain tumors. Tocus and Okita, 201

Fluorescein label technic, used in staining rhabdomyosarcomas. Hiramoto, Jurandowski, Bernecky, and Pressman, 383

Fluorescent-labeled antibodies, in detection of antigen of bovine cutaneous papilloma. Smithies and Olson, 1557
——, to rat liver microsomes, rat hepatoma not stained by. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372

Fluorescence microscope method, for cytodiagnosis of cancer. Bertalanffy, 422

Fluoride, effect on deaminase assay in normal and neoplastic rat liver. Maley and Maley, 1421
——, effect on phosphorylation in mitochondria and homogenates of various rat tissues. Aisenberg, 304

Fluorinated pyrimidine analogs, initial clinical studies with 5-iodo-2′-deoxyuridine. Calabresi, Cardoso, Finch, Kligerman, von Essen, Chu, and Welch, 550

9 α-Fluorocortisol, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

5-Fluorodeoxyuridine, effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377

3′-Fluoromethotrexate, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

5-Fluoroorotic acid, effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377
——, inhibition of dihydroorotase in Ehrlich ascites cells by. Bresnick and Hitchings, 105

9 α-Fluoroprednisolone, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

9 α-Fluoroprednisolone acetate, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Anido, and Mantel, 869

5-Fluorouracil, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323
——, effect on thymidine turnover in mouse marrow and intestine, *in vivo*. Field, Kriss, and Tung, 2
——, ineffective against leukemia L1210 when cells inoculated into brain. Skipper, Schabel, Trader, and Thomson, 1154
——, review on metabolic approaches to chemotherapy. Welch, 1475

5-Fluorouridine, effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377

Folic acid antagonists, review on metabolic approaches to chemotherapy. Welch, 1475

Food additives, use of, evaluation of carcinogenic hazard from. Subcommittee on Carcinogenesis, 429

Food Protection Committee, Food and Nutrition Board, Subcommittee on Carcinogenesis, evaluation of carcinogenic hazard from food additives, 429

Formaldehyde-C^{14}, incorporation into nulceic acids of mouse leukemia. Trams, Nadkarni, and Smith, 567

Fortner melanoma, hamster, growth and morphology in tissue culture. Rosenberg, Kodani, and Rosenberg, 632
——, hamster, pathologic characteristics of. Rosenberg, Assimacoupoulos, Lober, Rosenberg, and Zimmermann, 627

Fortner pancreatic tumor No. 1, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, hamster, transplantability after frozen storage. Sugiura, 496

Fortner small intestine tumor No. 1, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, hamster, transplantability after frozen storage. Sugiura, 496

Fractionation, cellular. *See* Cell fractionation.

Freeze-preservation, of enzymatically prepared tumor cell suspensions, and use in tumor transplantation. Vaitkevicius, Simpson, and Brennan, 187

Freund's adjuvant, lack of effect on tumor development in mice. Hirsch and Iversen, 752

Friend virus leukemia, mouse, transplantability after frozen storage. Sugiura, 496

Frozen storage, of various solid and ascites tumors. Sugiura, 496

Fructose-1,6-diphosphatase, activity decreased in Morris hepatoma 5123. Weber, Morris, Love, and Ashmore, 1406
——, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 933

Gardner lymphosarcoma. *See* Lymphosarcoma 6C3HED Gardner.

Genetic aspects, of physiological variability. Wolff, 1119

Genetics, chromosome number of Krebs-2 ascites carcinoma cultured *in vivo* and *in vitro*. Ely and Gray, 1020
——, chromosome variations in cultured kidney cells. Ruddle, 885
——, chromosomes in ontogeny and oncogeny. Hauschka, 957

Glass powder, lack of effect on carcinogenic process, in rat. Oppenheimer, Willhite, Danishefsky, and Stout, 132

Glioblastoma multiforme, human, implanted in guinea pig eye, depressed serum cholinesterase activity. LaMotta, Babbott, and Wetstone, 749

Glioma 26, mouse, transplantability after frozen storage. Sugiura, 496

Glioma tissue culture 178 (TC 178), transplanted into various mammals. Manuelidis, 876

Glucose, effect on glutamine utilization by Ehrlich ascites cells. Kvamme and Svenneby, 92
——, reversal of dinitrophenol effect by, on glycine uptake by mouse tumors. Ellis and Scholefield, 650
——, utilization by mouse liver and hepatocarcinoma C_{254}. Abraham, Chaikoff, and Cady, 938

Glucose-6-phosphatase, activity decreased in Morris hepatoma 5123. Weber, Morris, Love, and Ashmore, 1406
——, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 933
——, in mouse liver and hepatocarcinoma C_{254}. Abraham, Chaikoff, and Cady, 938

Glucose-6-phosphate dehydrogenase, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 933
——, activity normal in Morris hepatoma 5123. Weber, Morris, Love, and Ashmore, 1406

Glucuronic acid conjugates, as urinary metabolites of *N*-2-fluorenylacetamide. Weisburger, Grantham, Morris, and Weisburger, 949

β-glucuronidase, in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

Glutamate oxidation, in normal and neoplastic mitochondria. Aisenberg, 295

Glutamic acid, in modifying effect of vincaleukoblastine on dividing cells *in vivo*. Cutts, 168

Glutamic-oxalacetic transaminase, activities of liver and other tumors in the rat. Dyer, Gullino, Ensfield, and Morris, 1522

Glutamic-pyruvic transaminase. *See* Alanine-α-ketoglutarate transaminase.

Glutamine, effect of glucose on utilization of, by Ehrlich ascites cells. Kvamme and Svenneby, 92
——, effect on inhibition by diazo-oxo-norleucine of nucleic acid biosynthesis. Moore and Hurlbert, 257

L-Glutamine, cannot substitute for L-asparagine requirement of mouse leukemia L5178Y in culture. Haley, Fisher, and Welch, 532

Glutathione reductase, activity released from ascites tumor cells *in vitro*. Holmberg, 1386

Glycine, effects of uncoupling agents on uptake of, by transplantable mouse tumors. Ellis and Scholefield, 650

Glycine-C^{14}, effects of 4-aminopyrazolo(3,4-*d*)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-*d*)pyrimidine on incorporation of, into nucleic acids of ascites tumors. Henderson and Junga, 173

Glycine-2-C^{14}, effect of purinethiols on incorporation of, into ascites tumor cells *in vivo*. LePage and Jones, 642
——, incorporation into nucleic acid purines and protein in Walker tumor inhibited by psicofuranine. Magee and Everts, 611
——, incorporation into protein, nucleotides, and nucleic acids of L-1 mouse tumor inhibited by thioTEPA. Pradhan, West, Baird, and Steward, 984
——, incorporation into rat liver, effect of 6-chloropurine. Duggan, Weigert, and Titus, 1047

Glycolysis, effect on glutamine uptake by Ehrlich ascites cells. Kvamme and Svenneby, 92
——, of lymphoblasts *in vitro*. Holmburg, Bos, deBruyn, and Emmelot, 353

Goldfeder mammary adenocarcinoma DBAH, mouse, transplantability after frozen storage. Sugiura, 496

Goldfeder spindle-cell mammary tumor BDAG, mouse, transplantability after frozen storage. Sugiura, 496

Golgi complex, in tissue-cultured human melanoma cells, with phase contrast microscopy. Rose, 706
——, of human melanomas in tissue culture. Rose and Stehlin, 1455

Gonadotrophic hormone, and adrenal tumors in ovariectomized mice. Tullos, Kirschbaum, and Trentin, 730
——, chorionic, secreted by human embryonal carcinoma, effect of colchicine and x-radiation. Midgley and Pierce, 545
——, overstimulation of rat ovaries by, and tumor formation in. Johnson and Witschi, 783

Growth, mitochondrial characteristics of normal cells during. Mukherjee, De, and Mitra, 314
——, of free tumor cells in experimental subcutaneous cavity in mouse. Goldie, Walker, Avery, Houston, and McIver, 1113

Guanine, metabolism in human leukocytes *in vitro*. Shapira, Bornstein, Wells, and Winzler, 265

Guanine-C^{14}, effects of 4-aminopyrazolo(3,4-*d*)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-*d*)pyrimidine on incorporation of, into nucleic acids of ascites tumors. Henderson and Junga, 173

Guanine-8-C^{14}, anabolism and catabolism of, by minced neoplasms and minced tissues of rats and mice. Wheeler and Alexander, 399
——, metabolism in various rat and mouse tissues *in vivo*. Wheeler and Alexander, 390

Guest editorial, animal cancer as the primary tool. Day, 581
——, transplantable animal cancer as primary standard. Potter, 1331

Guinea pigs, transplantation of tissue culture cell lines to brains and eyes of. Manuelidis, 876

——, with locally implanted human tumor, depressed serum cholanesterase activity in. LaMotta, Babbott, and Wetstone, 749

Guinea pig serum, inhibitory activity of, on Walker carcinosarcoma 256 in rat. Kwak, Jameson, Ryan, and Kurtz, 44

Hamsters, bearing Human Sarcoma 1, anabolism and catabolism of purines by minced tissues of. Wheeler and Alexander, 399
——, bearing Pitt 61 or Deac 3 human tumor, effect of colchicine and x-radiation on differentiation of tumors. Midgley and Pierce, 545
——, carcinogenesis in cheek pouch of, soluble sulfhydryl groups. Morris, Scott, and Reiskin, 1352
——, effect of castration on spontaneous tumorigenesis in. Fortner, 1491
——, multipotential carcinogenesis with urethan, in. Toth, Tomatis, and Shubik, 1537
——, pathology of transplanted melanotic and amelanotic tumor in. Rosenberg, Assimacoupoulos, Lober, Rosenberg, and Zimmermann, 627
——, transplantation of tissue culture cell lines to subcutaneous space of. Manuelidis, 876
——, transplanted melanotic and amelanotic tumors in tissue culture. Rosenberg, Kodani, and Rosenberg, 632
——, tumor induction in, with oral 20-methylcholanthrene. Della Porta, 575
——, tumors of, frozen storage. Sugiura, 496
——, urinary bladder and liver tumors induced in, with *o*-aminoazotoluene. Tomatis, Della Porta, and Shubik, 1513
——, white, melanotic tumors induced by dimethylbenzanthracene. Rappaport, Pietra, and Shubik, 661

Haptens, lipide, in cancer antigens. Rapport and Graf, 1225

Harding-Passey melanoma, incorporation of 6-mercaptopurine-S^{35} into nucleic acids of. Bieber, Dietrich, Elion, Hitchings, and Martin, 228
——, mouse, transplantability after frozen storage. Sugiura, 496

Heart, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399

HeLa cells (Gey), drug sensitivity of, in agar plate assay. Schuurmans, Duncan, and Olson, 773
——, large-scale chemotherapy screening against, *in vitro*. Toplin, 1042
——, lines sensitive and resistant to actinomycin D, electron microscopy of. Journey and Goldstein, 929
——, not affected by normal rabbit serum in tissue culture. Tuttle and Foushee, 735
——, S-3 strain, transplanted into various mammals. Manuelidis, 876

Hemagglutinin, vaccinia, inhibitor of, in ascites of Ehrlich carcinoma of mouse. Wolin, 1030

Hemangiomas, in mice, induced by urethan. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71

Hemangiosarcomas, induced in hamster by urethan. Toth, Tomatis, and Shubik, 1537

Heme, effects of Ehrlich ascites tumor on incorporation of iron into. Origenes, Lester, and Labbe, 1430

Hepatectomy, partial, effect on subcutaneously transplanted hepatomas in mice. Trotter, 778

Hepatitis, incidence in birds in zoological gardens in Philadelphia. Ratcliffe, 26

Hepatocarcinogenesis, effect on 5-hydroxytryptophan decarboxylase and serotonin deaminase, in rat. Kizer and Chan, 489

Hepatocarcinoma C_{954}, glucose utilization by, in mice. Abraham, Chaikoff, and Cady, 938

Hepatoma, carbohydrate enzymes in Morris hepatoma 5123, in rats. Weber, Banerjee, and Morris, 933
——incidence in birds in zoological gardens in Philadelphia. Ratcliffe, 26
——, induced in hamster by urethan. Toth, Tomatis, and Shubik, 1537
——, potassium flux compared with that of normal liver, in rat. Humphrey, 1566
——, rat, induced by *N*-2-fluorenylacetamide, not stained by fluorescein-labeled antibody to rat liver microsomes. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372
——, rat, permeability to sucrose and inulin. Humphrey, 1523

Hepatoma 129, mouse, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in. Kizer and Chan, 489

Hepatoma 134, mouse, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in. Kizer and Chan, 489

Hepatoma 3683. *See* Morris Hepatoma 3683.

Hepatoma 5123. *See* Morris Hepatoma 5123.

Hepatoma AS4, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma C3HA-I, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma C3HS-II, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma C3HS-III, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma C3HS-IV, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma C3HS-VI, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma C3HS-AA, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma C3HS-BB, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma Miller. *See* Miller hepatoma.

Hepatoma Novikoff. *See* Novikoff hepatoma.

Hepatoma SS3, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma SS1H, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma SS1K, effect of partial hepatectomy on subcutaneous transplants of, in mice. Trotter, 778

Hepatoma Yoshida ascites. *See* Yoshida ascites hepatoma.

Hexobarbital, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Hexokinase specificity, of some tumor tissue extracts. Lange and Kohn, 1055

Hexosephosphate isomerase, in mouse liver and hepatocarcinoma C_{954}. Abraham, Chaikoff, and Cady, 938

Hexosterol, effect on respiration of ascites tumor cells *in vitro*. Dietrich and Friedland, 502

Histamine content, of mast-cell neoplasm, during treatment with cyclophosphamide, in mice. Mengel and Kelly, 1545

Histochemistry, of Walker tumor. Fisher and Fisher, 527

Histopathology, in hamster cheek pouch, correlated with soluble sulfhydryl groups during carcinogen application. Morris, Scott, and Reiskin, 1352

Histoplasma capsulatum, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

Historical review, American Association for Cancer Research. Triolo and Riegel, 137
——, postscripts to, American Association for Cancer Research. Triolo and Riegel, 1595

HN2. *See* Methylbis(β-chloroethyl)amine.

Hormones. *See also* specific hormones.
——, possible effect on spontaneous tumorigenesis in hamster. Fortner, 1491

Hormone sensitivity, of pituitary mammotropic tumors, changed during progression from normal to autonomous. Clifton and Furth, 913

Human, applications of immunology to clinical cancer, symposium. Southam, 1302
——, cells in culture, FL and amnion, micromorphology of cultures of, following high hydrostatic pressure. Landau and McAlear, 812
——, chromosome patterns in various conditions. Hauschka, 957
——, clinical evaluation of thioguanosine in leukemias. Krakoff, Ellison, and Tan, 1015
——, clinical experience with 6-aminonicotinamide, toxicity and lack of tumoricidal effects. Herter, Weissman, Thompson, Hyman, and Martin, 31
——, cytolipin in gastrointestinal tract. Graf, Rapport, and Brandt, 1532
——, electrophoretic fractionation of serum lactic dehydrogenase. Hill, 271
——, electrophoretic mobility of erythrocytes in. Rottino and Angers, 1445
——, epithelium of cervix, mitochondrial characteristics in growth and function. Mukherjee, De, and Mitra, 314
——, four cell lines compared with Sarcoma 180 as to drug sensitivity in agar plate assay. Schuurmans, Duncan, and Olson, 773
——, initial clinical studies with 5-iodo-2′-deoxyuridine. Calabresi, Cardoso, Finch, Kligerman, von Essen, Chu, and Welch, 550
——, *in vivo* chromosome constitution of bone marrow, leukemic and nonleukemic. Sandberg, Ishihara, Miwa, and Hauschka, 678
——, leukocytes, inhibition of mitosis by prednisolone *in vitro*. Nowell, 1518
——, leukocytes, *in vitro* metabolism of adenine and guanine. Shapira, Bornstein, Wells, and Winzler, 265
——, malignant tissues, toxohormone preparation from, composition and properties of. Yunoki and Griffin, 537
——, pyrimidine metabolism, alterations after treatment with 6-azauridine. Cardoso, Calabresi, and Handschumacher, 1551
——, tissues, primary short-term cultures of, comparative chemotherapy studies. Cobb, Walker, and Wright, 583

Human choriocarcinoma, estradiol-17β enzyme systems of. Kellogg, 319

Human embryonal carcinoma, effect of colchicine and x-radiation on differentiation of. Midgley and Pierce, 545

Human epidermoid carcinoma H.Ep. #2, large-scale chemotherapy screening against, *in vitro*. Toplin, 1042

Human epidermoid carcinoma H.Ep. #3, effects of cytoxan on, in rat. Teller and Woolley, 881
——, in mice, statistical methods and steroid therapy. Merker, Anido, and Mantel, 869

Human melanoma, in tissue culture, Golgi complex and melanin formation. Rose and Stehlin, 1455
——, tissue-cultured cells, studied with phase contrast microscopy. Rose, 706

Human Sarcoma H.S. #1, in hamster, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, effect of antitumor compounds on precursor utilization for pyrimidine synthesis in, carried in rats. Eidinoff, Knoll, Marano, and Klein, 1377
——, effects of cytoxan on, in rat. Teller and Woolley, 881

Human tumor, implanted in guinea pig eye, depressed serum cholinesterase activity. LaMotta, Babbott, and Wetstone, 749

Hydrocarbons, bound to mouse skin proteins, fractionation of latter. Davenport, Abell, and Heidelberger, 599
——, carcinogenic, and electronic structure of DNA. Hoffmann and Ladik, 474
——, polycyclic, concentration in mouse skin under various experimental conditions. Bock and Burnham, 510
——, polynuclear, factors affecting level of, in rat mammary glands. Bock and Dao, 1024
——, polynuclear aromatic, electronic structure and carcinogenic effect of. Koutecký and Zahradník, 457
——, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

Hydrocortisone, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221

Hydrostatic pressure, effect on micromorphology of FL and primary human amnion cells. Landau and McAlear, 812

N-Hydroxy-4-acetylaminobiphenyl, strong carcinogenicity in the rat. Miller, Wyatt, Miller, and Hartmann, 1465

N-Hydroxy-2-acetylaminofluorene, carcinogenic activity, in rat. Miller, Miller, and Hartmann, 815

17-Hydroxycorticosterone-21-acetate, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

3-Hydroxy-1,2,5,6-dibenzanthracene, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

2-Hydroxy-4-dimethylaminoazobenzene, lack of carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 1068

5-Hydroxyindoleacetic acid, excretion of, during cyclophosphamide treatment of mast-cell neoplasm, in mouse. Mengel and Kelly, 1545

***Trans*-4-Hydroxy-4-methylpent-2-enoic acid**, antitumor effect tested, in mice. Gitter, Gallily, Shohat, and Lavie, 516

2-Hydroxy-4-monomethylaminoazobenzene, lack of carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 1068

Hydroxyproline, epidermal, decreased in induced epiderma carcinogenesis, in mice. Fels and Greco, 40
——, in rat liver, relation to collagen formation and fibrogenesis. Hutterer, Rubin, Singer, and Popper, 206

5-Hydroxytryptophan decarboxylase, in transplanted hepatomas and induced rat liver tumor. Kizer and Chan, 489

Hyperlipemia, effect on pulmonary metastases of Walker tumor in rat. Clifton, Agostino, and Minde, 1062

Hypophysectomy, effect on level of polynuclear hydrocarbons in rat mammary glands after oral administration. Bock and Dao, 1024

Hypophysis. *See* Pituitary.

Hypoxanthine-8-C^{14}, anabolism and catabolism of, by minced neoplasms and minced tissues of rats and mice. Wheeler and Alexander, 399
——, metabolism in various rat and mouse tissues *in vivo*. Wheeler and Alexander, 390

Iglesias adrenal tumor, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412

Iglesias functional adrenal tumor, rat, transplantability after frozen storage. Sugiura, 496

Iglesias functional ovarian tumor, rat, transplantability after frozen storage. Sugiura, 496

Iglesias ovarian tumor, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412

Iglesias sarcoma, rat, antitumor activity of cytoxan against. Sugiura, Schmid, and Schmid, 1412
——, rat, transplantability after frozen storage. Sugiura, 496

Immunity, role in accelerated development of spontaneous mammary tumors in mice pretreated with tumor tissue. Hirsch and Iversen, 752
——, to Sarcoma 180 in some mice, and induction of leukemia. dePasqualini, Holmberg, Rabasa, and Pavlovksy, 387

Immunochemical differentiation, of rhabdomyosarcomas. Hiramoto, Jurandowski, Bernecky, and Pressman, 383

Immunological studies, of organ and tumor lipides, cytolipin G in gastrointestinal tract, in human. Graf, Rapport, and Brandt, 1532

Immunology, and cancer, symposium, applications to clinical cancer. Southam, 1302
——, and cancer, symposium, cancer antigens. Rapport and Graf, 1225
——, and cancer, symposium, cytotoxic action of antibody and complement. Mayer, 1262
——, and cancer, symposium, discussion following Dr. Eisen's paper. Chase, 1277

——, and cancer, symposium, discussion following Dr. Heidelberger's paper. Rapport, 1257
——, and cancer, symposium, discussion following Dr. Mayer's paper. Chase, 1270
——, and cancer, symposium, discussion following Dr. Southam's paper. Chase, 1317
——, and cancer, symposium, discussion following Dr. Witebsky's paper. Amos, 1223
——, and cancer, symposium, discussion following paper by Old *et al.* Chase, 1301
——, and cancer, symposium, discussion following paper by Drs. Rapport and Graf, 1238
——, and cancer, symposium, discussion following papers by Drs. Rubin and Heidelberger. Amos, 1258
——, and cancer, symposium, discussion of technics. Furth, 1209
——, and cancer, symposium, final summary and discussion. Ravdin, 1325
——, and cancer, symposium, formal discussion of papers of Drs. Witebsky, Rapport and Graf, and Rubin. Heidelberger, 1254
——, and cancer, symposium, regression of autochthonous tumors. Eisen, 1275
——, and cancer, symposium, reticuloendothelial system and neoplasia. Old, Benacerraf, Clarke, Carswell, and Stockert, 1281
——, and cancer, symposium summary of informal discussion, first session. Bang, 1184
——, and cancer, symposium, tumor viruses and cell behavior. Rubin, 1244
——, and cancer, symposium, whither bound. Grabar, 1318
——, and cancer, symposium, whither bound. Taliaferro, 1323
——, antigen of bovine cutaneous papilloma detected by fluorescent antibodies. Smithies and Olson, 1557
——, capacity to resist infection studied in high- and low-leukemic strains of mice. Murphy and Syverton, 921
——, depression of tumor growth in mouse strain systems. Wigzell, 365
——, effect of antisera against Ehrlich ascites cells on tumor cells. Kornguth and Stahmann, 907
——, growth of L-fibroblasts in diffusion chambers in resistant, hyperimmunized mice. Gabourel, 506
——, host reaction to own cancer cells. Kidd, 1170
——, mixed agglutination reactions in normal and malignant cells. Coombs, 1198
——, of autochthonous cancer, evaluation of procedures. Osler, 1187
——, possible role in cancer, symposium. American Cancer Society, 1165
——, possible role of, in cancer, introduction. Milder, 1169
——, review of immunological investigations on cancer. Milgrom, 862
——, self-recognition and autoantibody formation. Witebsky, 1216
——, transplanted tumor as research tool in. Kaliss, 1203
——, uptake of serum proteins by neoplastic liver cells, with fluorescein-labeled antibodies. Cohen, Beiser, and Hsu, 1510

Inactivation, photodynamic, of tumor cells *in vitro*. Bellin, Mohos, and Oster, 1365

India ink, reticuloendothelial interference with, effect on hepatic metastases. Fisher and Fisher, 275

Infection, mycotic, resistance of high- and low-leukemic strains of mice to, compared. Murphy and Syverton, 921

Inhibitor, of ribonuclease, isolated from Ehrlich ascites tumor. Colter, Kuhn, and Ellem, 48
——, of vaccinia hemagglutinin, in ascites of Ehrlich carcinoma of mouse. Wolin, 1030

Inosine-5′-phosphatase, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232

Insulin-I^{131}, hydrolysis of, by homogenates of Walker carcinoma 256. Green and Miller, 1034

Interference microscope, measuring changes in dry mass of Ehrlich ascites tumor cells. Lee, Richards, and Furst, 1108

Internal diffusion constant, smaller in induced hepatoma than in rat liver, in study of potassium flux. Humphrey, 1566

Intestine, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673
——, hemangiomas induced in, by urethan, in mice. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71
——, mouse metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118
——, mucosa of, incorporation of thymidine into DNA in, and effect of 5-fluorouracil. Field, Kriss, and Tung, 2
——, rat, effect of antitumor compounds on precursor utilization for pyrimidine synthesis in. Eidinoff, Knoll, Marano, and Klein, 1377
——, rat, thymidine incorporation and DNA content of slices of. Aisenberg, 1560
——, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, rat and mouse, purine metabolism *in vivo* in. Wheeler and Alexander, 390
——, rat and mouse, sonicates of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407
——, small, mitochondrial change in, in mice, after 20-methylcholanthrene. Burt, Killmeyer, Thompson, and Grauer, 1427
——, small, rat, tumors of, produced by *N*-hydroxy-2-acetylaminofluorene. Miller, Miller, and Hartmann, 815
——, tumors of, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 575

Inulin, permeability of normal liver and of hepatoma to, in rat. Humphrey, 1573

5-Iodo-2′-deoxyuridine, initial clinical studies with. Calabresi, Cardoso, Finch, Kligerman, von Essen, Chu, and Welch, 550

5-Iododeoxyuridine-I^{131}, administered in the mouse and rat. Hampton and Eidinoff, 345

Iron, effects of Ehrlich ascites tumor on incorporation of, into heme. Origenes, Lester, and Labbe, 1430
——, histochemical analysis of, in spontaneous and induced primary tumors in rats. Arnold and Sasse, 761

Iron-protoporphyrin chelation, by liver mitochondria from control and tumor-bearing mice. Origines, Lester, and Labbe, 1530

Irradiation. *See also* Radiation and X-radiation.
——, of benzpyrene-induced skin tumors in mouse, sulfur-35 uptake by surrounding connective tissue. Duhig, 485
——, total-body leukemia induction in mice by, and inhibitory effect of testosterone. Wasi and Block, 463

JA-1 sarcoma, carbon dioxide metabolism in, *in vitro*. McCoy, Maxwell, and Kruse, 997

JA-2 sarcoma, carbon dioxide metabolism in, *in vitro*. McCoy, Maxwell, and Kruse, 997

Jensen sarcoma, and variants, carbon dioxide metabolism in, *in vitro*. McCoy, Maxwell, and Kruse, 997
——, antitumor activity of cytoxan against, in rat. Sugiura, Schmid, and Schmid, 1412
——, hexokinase specificity of preparations from. Lange and Kohn, 1055
——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat, transplantability after frozen storage. Sugiura, 496
——, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

K region, reactivity, electronic structure of hydrocarbons and. Koutecký and Zahradník, 457

KB cells, Eagle's, drug sensitivity of, in agar plate assay. Schuurmans, Duncan, and Olson, 773
——, not affected by normal rabbit serum in tissue culture. Tuttle and Foushee, 735

Kidney, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673

Kidney—*Continued*
——, cultured, epithelial cells, transplanted into various mammals. Manuelidis, 876
——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118
——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, pig, chromosome variation in cultured cells of. Ruddle, 885
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, tumor of, transplantable, of the rat. Babcock and Southam, 130

Koala, New South Wales, acute leukemia in. Heuschele and Hayes, 1394

Krebs-2 carcinoma, ascites, chromosome number of, in *in vivo* and *in vitro* culture. Ely and Gray, 1020
——, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48
——, cells, free cell growth in experimental subcutaneous cavity in the mouse. Goldie, Walker, Avery, Houston, and McIver, 1113
——, regression of, by use of mixed bacterial toxins in mice. Havas and Donnelly, 17
——, vaccinia hemagglutinin inhibitor in ascites of. Wolin, 1030

Kynureninase, rat liver, decreased after feeding of 3′-methyl-4-dimethylaminoazobenzene. Petasnick, Brown, and Price, 1400

Kynurenine transaminase, no change after feeding of 3′-methyl-4-dimethylaminoazobenzene. Petasnick, Brown, and Price, 1400

L-1 tumor. *See* Lymphosarcoma L-1.

L-fibroblasts. *See* Strain L fibroblasts.

Lactic dehydrogenase, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 933
——, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232
——, activity of Strain L cells increased in anaerobiosis. Adebonojo, Bensch, and King, 252
——, activity released from ascites tumor cells *in vitro*. Holmberg, 1386
——, serum, electrophoresis of, in human, Hill, 271

Latex, of Euphorbia, tumor promotion by. Roe and Peirce, 338

Lettré-Ehrlich ascites tumor, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48

DL-Leucine-1-C^{14}, incorporation into Walker carcinoma 256 cell cultures. Green and Miller, 1034

Leukemia. *See also* Lymphoma.
——, acute, in New South Wales koala. Heuschele and Hayes, 1394
——, clinical effect of thioguanosine on. Krakoff, Ellison, and Tan, 1015
——, human, *in vivo* chromosome constitution of marrow from. Sandberg, Ishihara, Miwa, and Hauschka, 678
——, induction of, and immunity to Sarcoma 180, in mice. dePasqualini, Holmberg, Rabasa, and Pavlovsky, 387
——, in Hiroshima atom bomb survivors and other clinical cases. Upton, 717
——, in mice, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309
——, irradiation-induced, in mice, inhibited by testosterone. Wasi and Block, 463
——, spontaneous, heterotransplantation from mice into newborn rats. Kirsten, Anderson, and Platz, 767
——, spontaneous, in mice, influence of urethan on. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71
——, virus-induced lymphoid, in mice, response to drug therapy. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803

Leukemia AKR, spontaneous, heterotransplantation from mice into newborn rats. Kirsten, Anderson, and Platz, 767

Leukemia L1210, CCRF cell line of, effect of cytoxan on culture of. Foley, Friedman, and Drolet, 57
——, effect of caloric restriction on survival of mice. Laster, Schabel, Skipper, Wilcox, and Thomson, 895
——, effect of vincaleukoblastine on cells of, in mice. Cardinali, Cardinali, and Blair, 1542
——, effect of vincaleukoblastine on mitosis in ascites cells of. Cutts, 168
——, immunological depression of growth of, in mice. Wigzell, 365
——, large-scale chemotherapy screening against, in tissue culture. Toplin, 1042
——, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, mouse, ascites, incorporation of alkylating agents into DNA of. Trams, Nadkarni, and Smith, 560
——, mouse, effectiveness of antileukemic drugs dependent on anatomical distribution of cell of. Skipper, Schabel, Trader, and Thomson, 1154
——, mouse, effects of nitrogen mustard, Myleran, and x-radiation on nucleic acid biosynthesis in. Trams, Nadkarni, and Smith, 567
——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in ascites cells of. Henderson and Junga, 118
——, mouse, purine metabolism *in vivo* in. Wheeler and Alexander, 390
——, mouse, sonicates of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407

Leukemia L4946, antitumor activity of cytoxan against, in mouse. Sugiura, Schmid, and Schmid, 1412
——, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, mouse, transplantability after frozen storage. Sugiura, 496

Leukemia L5178, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399

Leukemia L5178Y, mouse, requirement for L-asparagine in culture. Haley, Fischer, and Welch, 532
——, pyrimidine metabolism in cells of, resistant to 6-azauridine. Pasternak, Fischer, and Handschumacher, 110

Leukemia P-1534, CCRF cell line of, effect of cytoxan on culture of. Foley, Friedman, and Drolet, 57

Leukemic cells, mice, stathmokinetic effect of vincaleukoblastine on. Cardinali, Cardinali, and Blair, 1542

Leukemic strains, of mice, and low-leukemic, relative immunologic capacity to resist infection. Murphy and Syverton, 921

Leukemogenesis, in mice, by x-rays, estrogen, methylcholanthrene, and urethan, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309

Leukocytes, human, inhibition of mitosis by prednisolone *in vitro*. Nowell, 1518
——, human, *in vitro* metabolism of adenine and guanine. Shapira, Bornstein, Wells, and Winzler, 265

Lewis bladder carcinoma, antitumor activity of cytoxan against, in mouse. Sugiura, Schmid, and Schmid, 1412
——, incorporation of 6-mercaptopurine-S^{35} into nucleic acids of. Bieber, Dietrich, Elion, Hitchings, and Martin, 228
——, mouse, transplantability after frozen storage. Sugiura, 496

Lewis lung carcinoma, mouse, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, mouse, transplantability after frozen storage. Sugiura, 496

Lipase, in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

Lipide composition, of epidermis and dermis of mice undergoing methylcholanthrene-induced carcinogenesis. Carruthers and Davis, 82

Lipide fractions, from Sarcoma 180, no effect on transplantation of Sarcoma 180. Malkiel and Hargis, 1461

Lipide haptens, in cancer antigens. Rapport and Graf, 1225
——, new, in tumors and tissues of gastrointestinal tract, in human. Graf, Rapport, and Brandt, 1532

Lipides, in toxohormone preparation from human malignant tissues. Yunoki and Griffin, 537
——, organ and tumor, cytolipin G in gastrointestinal tract, in human. Graf, Rapport, and Brandt, 1532

Lipide synthesis, in rat liver slices, effect of 6-chloropurine on. Duggan, Weigert, and Titus, 1047

Lipopolysaccharide fraction, from *B. pertussis*, inhibits transplantation of Sarcoma 180 in mouse. Malkiel and Hargis, 1461

Liver, cell proliferation and fibrogenesis in, in rats. Hutterer, Rubin, Singer, and Popper, 206
——, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673
——, effect of dietary protein on inducible enzymes in, in rat. Pitot, Potter, and Morris, 1001
——, effect of partial hepatectomy on subcutaneously transplanted hepatomas in mice. Trotter, 778
——, extracts of, from Cytoxan-treated rats, inhibitory for mammalian cell culture. Foley, Friedman, and Drolet, 57
——, hemangiomas induced in, by urethan, in mice. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71
——, iron utilized for heme synthesis related to amount of iron taken up *in vivo*. Origenes, Lester, and Labbe, 1430
——, metastases of Walker tumor cells into, effect of reticuloendothelial interference on. Fisher and Fisher, 275
——, mouse, glucose utilization by. Abraham, Chaikoff, and Cady, 938
——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118
——, mouse, ultrastructure of nuclear envelope of. Barton, 198
——, normal, quantitative and histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761
——, normal and tumorous, mouse, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in. Kizer and Chan, 489
——, normal human (Chang), drug sensitivity of, in agar plate assay. Schuurmans, Duncan, and Olson, 773
——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, adult, embryo, and regenerating, activities of deoxycytidylate deaminase and thymidylate synthetase in. Maley and Maley, 1421
——, rat, carbohydrate metabolism compared with rat hepatoma. Weber, Morris, Love, and Ashmore, 1406
——, rat, effect of antitumor compounds on precursor utilization for pyrimidine synthesis in. Eidinoff, Knoll, Marano, and Klein, 1377
——, rat, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522
——, rat, metabolic effects of 6-chloropurine on. Duggan, Weigert, and Titus, 1047
——, rat, normal and neoplastic, activities of deoxycytidylate deaminase and thymidylate synthetase in. Maley and Maley, 1421
——, rat, normal and regenerating, thymidine incorporation and DNA content of slices of. Aisenberg, 1560
——, rat, normal and tumorous permeability to sucrose and inulin. Humphrey, 1573
——, rat, potassium flux compared with that of hepatoma. Humphrey, 1566
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat, tryptophan pyrrolase and tyrosine α-ketoglutarate transaminase in. Pitot and Morris, 1009
——, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, rat and mouse, purine metablism *in vivo* in. Wheeler and Alexander, 390
——, rat and mouse, sonicates of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407
——, regenerating, mouse, incorporation of alkylating agents into DNA of. Trams, Nadkarni, and Smith, 560
——, tumors of, induced by 3′-methyl-4-dimethylaminoazobenzene, tryptophan metabolism in, in rat. Petasnick, Brown, and Price, 1400
——, tumors of, induced in hamsters with *o*-aminoazotoluene. Tomatis, Della Porta, and Shubik, 1513
——, tumors of, induced with dimethylaminoazobenzene, histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761
——, tumors of, induced with *p*-dimethylaminoazobenzene, uptake of serum proteins by cells of. Cohen, Beiser, and Hsu, 1510
——, tumors of, rat, metabolism of drugs by. Adamson and Fouts, 667
——, tumors of, produced in rats by *N*-hydroxy-2-acetylaminofluorene. Miller, Miller, and Hartmann, 815
——, tumors of, transplantable, not stained by fluorescein-labeled antibody to rat liver microsomes. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372

Lung. *See also* Pulmonary.
——, cancer of, patterns of metastasis in, *review*. Onuigbo, 1077
——, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673
——, metastases of Walker tumor to, effect of hyperlipemia on. Cliffton, Agostino, and Minde, 1062
——, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, tumors of, in white Pekin ducks, by methylcholanthrene. Rigdon, 571

Lymphoblasts, glycolytic and respiratory properties of nonmalignant and malignant, *in vitro*. Homburg, Bos, deBruyn, and Emmelot, 353
——, of leukemia L5178Y, requirement for L-asparagine in culture, Haley, Fischer, and Welch, 532

Lymphocytes, thymic, destruction and regeneration in induction of leukemia in mice by irradiation. Wasi and Block, 463

Lymphoma. *See also* Leukemia.
——, immunological depression of growth of, in contrast to carcinomas and sarcomas. Wigzell, 365
——, incidence in mice exposed to whole-body radiation. Upton, 717

Lymphoma P-195, ascites, mouse, incorporation of alkylating agents into DNA of. Trams, Nadkarni, and Smith, 560

Lymphoma P-329(8), ascites, mouse, incorporation of alkylating agents into DNA of. Trams, Nadkarni, and Smith, 560

Lymphoma WL3, immunological depression of growth of, in mice. Wigzell, 365

Lymphoma WL4, immunological depression of growth of, in mice. Wigzell, 365

Lymphosarcoma 6C3HED Gardner, ascites, effect of purinethiol derivatives on mice *in vivo*. LePage and Jones, 642
——, ascites, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118
——, damage to, compared with that to bone marrow, in chemotherapy studies on mice. Vogel, 636
——, dye-sensitized photoinactivation of, *in vitro*. Bellin, Mohos, and Oster, 1365
——, lack of effect of mixed bacterial toxins on, in mouse. Havas and Donnelly, 17
——, mouse, tumor-marrow index for. Vogel, 1450
——, tumor and marrow damage in mice bearing, with methotrexate and derivatives. Vogel, 743

Lymphosarcoma L-1, effect of thioTEPA on synthesis of protein and nucleic acids in mice bearing. Pradhan, West, Baird, and Steward, 984

Lymphosarcoma Mecca, antitumor activity of cytoxan against, in mouse. Sugiura, Schmid, and Schmid, 1412
——, ascites, effect of purinethiol derivatives on mice *in vivo*. LePage and Jones, 642
——, mouse, transplantability after frozen storage. Sugiura, 496
——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118

Lymphosarcoma Murphy-Sturm, antitumor activity of cytoxan against, in rat. Sugiura, Schmid, and Schmid, 1412
——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat, transplantability after frozen storage. Sugiura, 496
——, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

Lymphosarcoma R2788 Dunning, studies on cachexia of rats bearing. Rechcigl, Grantham, and Greenfield, 238

DL-Lysine-1-C^{14}, incorporation into protein of L-1 mouse tumor inhibited by thioTEPA. Pradhan, West, Baird, and Steward, 984

DL-Lysine-2-C^{14}, incorporation into mouse skin proteins, effect of hydrocarbons on. Davenport, Abell, and Heidelberger, 599

Maben cells (Frisch), human, drug sensitivity of, in agar plate assay. Schuurmans, Duncan, and Olson, 773

Mammal, acute leukemia in New South Wales koala. Heuschele and Hayes, 1394

Mammary adenocarcinoma. *See also* Adenocarcinoma.
——, adenosine triphosphatase activity of cell fractions of, in mouse. Miller and Goldfeder, 64
——, in mouse, cytoxan somewhat inhibitory on. Sugiura, Schmid, and Schmid, 1412

Mammary adenocarcinoma 72j. *See* Adenocarcinoma 72j

Mammary adenocarcinoma 6338, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522

Mammary adenocarcinoma dbrB, dye-sensitized photoinactivation of, *in vitro*. Bellin, Mohos, and Oster, 1365

Mammary adenocarcinoma DBRB 109, CCRF cell line of, effect of Cytoxan on culture of. Foley, Friedman, and Drolet, 57

Mammary carcinoma. *See also* Carcinoma.

Mammary carcinoma 755. *See* Adenocarcinoma 755.

Mammary carcinoma SDB1, spontaneous, in mice, immunological study of. Wigzell, 365

Mammary carcinoma SDB2, spontaneous, in mice, immunological study of, Wigzell, 365

mammary glands, mammary duct stimulation by tumor transplants in mice. Argyris and Argyris, 75
——, normal, quantitative and histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761
——, rat, factors affecting polynuclear hydrocarbon level in. Bock and Dao, 1024
——, rat, tumors of, produced by *N*-hydroxy-2-acetylaminofluorene. Miller, Miller, and Hartmann, 815
——, spontaneous tumors of, histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761
——, tumorigenesis of, in mice, effects of pituitary isograft on. Liebelt and Liebelt, 86

Mammary tumor agent, effects of single pituitary isograft on mammary tumorigenesis in mice, in presence or absence of. Liebelt and Liebelt, 86

Mammary tumors, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 575
——, induced in hamster with urethan. Toth, Tomatis, and Shubik, 1537
——, induced in rodents by ionizing radiation. Yokoro, Furth, and Haran-Ghera, 178
——, induction in mice, with mammotrophin. Haran-Ghera, 790
——, spontaneous, accelerated development in mice pretreated with mammary tumor tissue. Hirsch and Iversen, 752
——, spontaneous and methylcholanthrene-induced, lack of effect of mixed bacterial toxins on, in mouse. Havas and Donnelly, 17

Mammotrophin, role in mammary tumor induction in mice. Haran-Ghera, 790

Mammotropic pituitary tumors, induced in rodents by x-rays. Yokoro, Furth, and Haran-Ghera, 178

Marrow, bone. *See* Bone marrow.

MB III′, nonmalignant strain of lymphoblasts, glycolytic properties *in vitro*. Homburg, Bos, deBruyn, and Emmelot, 353

MB VIA, malignant strain of lymphoblasts, glycolytic properties *in vitro*. Homburg, Bos, deBruyn, and Emmelot, 353

Mecca lymphosarcoma. *See* Lymphosarcoma Mecca.

Mechlorethamine. *See* Methylbis(β-chloroethyl)amine.

3′-Me-DAB. *See* 3′-Methyl-4-dimethylaminoazobenzene.

Medium, culture, effect on chromosome number of Krebs-2 ascites carcinoma. Ely and Gray, 1020

Melanin formation, in human melanomas in tissue culture. Rose and Stehlin, 1455

Melanoma, human, Golgi complex and melanin formation in Golgi complex. Rose and Stehlin, 1455
——, human cells, tissue-cultured, studied with phase contrast microscopy. Rose, 706
——, malignant, in hamsters, growth and morphology of transplanted, in tissue culture. Rosenberg, Kodani, and Rosenberg, 632
——, malignant, in hamsters, pathologic characteristics of amelanotic and melanotic. Rosenberg, Assimacoupoulos, Lober, Rosenberg, and Zimmermann, 627
——, mouse, efficacy of phenylalanine mustards against. Luck, 262

Melanoma Cloudman S-91. *See* Cloudman melanoma S-91.

Melanoma Harding-Passey. *See* Harding-Passey melanoma.

Melanotic tumors, induced in hamster by urethan. Toth, Tomatis, and Shubik, 1537
——, white hamster, induced by dimethylbenzanthracene. Rappaport, Pietra, and Shubik, 661

Melphalan. *See* Sarcolysin.

6-Mercaptopurine, and derivatives, tested against Carcinoma 755. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
——, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323
——, drug sensitivity of frozen and nonfrozen tumors to. Sugiura, 496
——, effect alone and with azaserine on ascites tumor cells *in vivo*. LePage and Jones, 642
——, effect on bone marrow and tumor tissue of mice treated with. Vogel, 636
——, effect on metabolism of adenine and guanine in human leukocytes *in vitro*. Shapira, Bornstein, Wells, and Winzler, 265
——, ineffective against leukemia L1210 when cells inoculated into brain. Skipper, Schabel, Trader, and Thomson, 1154
——, lack of effect on transplantable mouse leukemia. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803
——, review on metabolic approaches to chemotherapy. Welch, 1475
——, ribonucleoside of, effective against Carcinoma 755. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450
——, tumor-bearing mice treated with, and concentrations of enzymes, nitrogen, and DNA in tumor. Fodor, Clarke, and Bodansky, 232
——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

6-Mercaptopurine-S^{35}, incorporation into nucleic acids of transplantable mouse tumors. Bieber, Dietrich, Elion, Hitchings, and Martin, 228

Metals, heavy, histochemical analysis of, in spontaneous and induced primary tumors in rats. Arnold and Sasse, 761

Metastases, blood-borne, effect of age of host on incidence of, in mice. Estensen and Baserga, 799

——, hepatic, effect of reticuloendothelial interference on. Fisher and Fisher, 275
——, of benzpyrene-induced skin tumors in mouse, effect of irradiation on. Duhig, 485
——, of Walker carcinoma, induced, ultrastructure and histochemical features of, in hepatic. Fisher and Fisher, 527
——, passage of tumor cells through capillaries. Zeidman, 38
——, patterns of, in lung cancer, *review*. Onuigbo, 1077
——, produced by carcinostatic agents in mice. Kondo and Moore, 1396
——, pulmonary, of Walker tumor, effect of hyperlipemia on. Cliffton, Agostino, and Minde, 1062

Methotrexate. *See* Amethopterin.

2-Methoxy-4-aminoazobenzene, lack of carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 1068

3-Methoxy-4-aminoazobenzene, carcinogenicity of, and *N*-methyl derivatives, for extrahepatic rat tissues. Miller and Miller, 1068

2-Methoxy-2-dimethylaminoazobenzene, lack of carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 1068

2-Methoxy-4-monomethylaminoazobenzene, lack of carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 1068

3-Methoxy-4-monomethylaminoazobenzene, carcinogenicity of, for extrahepatic rat tissues. Miller and Miller, 1068

2-Methylamino-6-purinethiol, effect alone and with other purinethiols on ascites tumor cells *in vivo*. LePage and Jones, 642

1-Methyl-2-amino-6-purinethione, lack of feedback inhibition of purine synthesis in ascites tumor cells *in vivo* by. LePage and Jones, 642

6-Methyl-2-amino-6-purinethiol, lack of feedback inhibition of purine synthesis in ascites tumor cells *in vivo* by. LePage and Jones, 642

1-Methyl-4-aminopyrazolo(3,4-*d*)pyrimidine, effect on nucleic acid purine metabolism in ascites tumors. Henderson and Junga, 173

9-Methylanthracene, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

7-Methylbenz[*a*]anthracene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

6-Methylbenzo[*a*]pyrene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510

Methylbis(β-chloroethyl)amine, cytoxan more effective as antitumor agent than. Sugiura, Schmid, and Schmid, 1412
——, dry mass of Ehrlich ascites tumor cells increased after treatment with. Lee, Richards, and Furst, 1108
——, effect on mouse lung metastases following intravenous injection of tumor cells. Kondo and Moore, 1396
——, effect on nucleic acid biosynthesis in mouse leukemia. Trams, Nadkarni, and Smith, 567
——, reactions with Ehrlich cells. Rutman, Steele, and Price, 1134
——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

3- or 20-Methylcholanthrene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510
——, dietary, no effect on *N*-hydroxylation of 4-acetylaminobiphenyl. Miller, Wyatt, Miller, and Hartmann, 1465
——, epidermal carcinogenesis induced by, and changes in hydroxyproline and tryosine. Fels and Greco, 40
——, influences of corticosteroids on mouse sarcomas induced by. Nakai, 221
——, in induction of carcinogenesis of skin in mice, lipide composition of epidermis and dermis. Carruthers and Davis, 82
——, lack of inhibition of carcinogenicity of *N*-hydroxy-2-acetylaminofluorene by. Miller, Miller, and Hartmann, 815
——, lack of response of tumors induced by, to mixed bacterial toxins. Havas and Donnelly, 17
——, leukemogenic effect of, in mice, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309
——, levels in mammary and fat tissues, in rat, after feeding of. Bock and Dao, 1024
——, mitochondrial change in small intestine of mice after feeding of. Burt, Killmeyer, Thompson, and Grauer, 1427
——, pulmonary neoplasms produced by, in white Pekin ducks. Rigdon, 571
——, skin tumors induced in mice with, effect of stilbestrol. Svoboda, 993

3′-Methyl-4-dimethylaminoazobenzene, effect of feeding of, on tryptophan metabolism of rats. Petasnick, Brown, and Price, 1400
——, rat liver tumor induced by, and levels of 5-hydroxytryptophan decarboxylase and serotonin deaminase. Kizer and Chan, 489

Methylene blue, photoinactivation of tumor cells *in vitro* sensitized by. Bellin, Mohos, and Oster, 1365

N-Methylformamide, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323
——, tested for effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377

1-Methyl-1-nitrosourea, some effect on mice with intracerebral L1210 leukemic cells. Skipper, Schabel, Trader, and Thomson, 1154

Methylprednisolone, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221

6-Methylpurine, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323

9-Methyl thioguanine, lack of feedback inhibition of purine synthesis in ascites tumor cells *in vivo* by. LePage and Jones, 642

6-(Methylthio)purine, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690

Microscopy, electron, of FL and primary human amnion cells following high hydrostatic pressure. Landau and McAlear, 812
——, electron, of HeLa cell lines sensitive and resistant to actinomycin D. Journey and Goldstein, 929
——, electron, of isolated liver and tumor nuclei. Barton, 198
——, electron, of L strain cells, virus-like particles in. Dales and Howatson, 193
——, electron, of mitochondrial change in small intestine after 20-methylcholanthrene. Burt, Killmeyer, Thompson, and Grauer, 1427
——, electron, of Walker carcinosarcoma 256, in rat. Mercer and Easty, 52
——, electron, of Walker tumor. Fisher and Fisher, 527
——, electron, of Yoshida ascites hepatoma cells. Bairati, 989
——, fluorescence, with acridine orange, in cytodiagnosis of cancer. Bertalanffy, 422
——, phase of human melanomas in tissue culture. Rose and Stehlin, 1455
——, phase contrast, in study of cultured human melanoma cells. Rose, 706

Microsomes. *See also* Cell fractionation.
——, liver, enzymes in metabolism of drugs, in rat. Adamson and Fouts, 667
——, rat liver, rat hepatomas not stained by fluorescein-labeled antibody to. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372

Miller hepatoma, transplantable, not stained by fluorescein-labeled antibody to rat liver microsomes. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372

Mineral oil, in inducing experimental subcutaneous cavity of scalp of mouse. Goldie, Walker, Avery, Houston, and McIver, 1113

Mitochondria. *See also* Cell fractionation.
——, adenosine triphosphatase activity of, from mouse mammary adenocarcinoma. Miller and Goldfeder, 64

Mitochondria—*Continued*
——, change in small intestine after 20-methylcholanthrene, electron microscopy. Burt, Killmeyer, Thompson, and Grauer, 1427
——, characteristics of, in normal cells in growth and function in epithelium of human cervix. Mukherjee, De, and Mitra, 314
——, normal and neoplastic, rat tissues, phosphorylation. Aisenberg, 304
——, normal and neoplastic, respiration in. Aisenberg, 295

Mitomycin C, drug sensitivity of frozen and nonfrozen tumors to. Sugiura, 496
——, effect on bone marrow and tumor tissue of mice treated with. Vogel, 636
——, ineffective against leukemia L1210 when cells inoculated into brain. Skipper, Schabel, Trader, and Thomson, 1154
——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Mitosis, in human leukocytes *in vitro,* inhibited by prednisolone. Nowell, 1518
——, in L1210 ascites tumor and normal rat bone marrow, effect of vincaleukoblastine on. Cutts, 168
——, metaphase arrest, by vincaleukoblastine in normal bone marrow and leukemic cells, in mice. Cardinali, Cardinali, and Blair, 1542

Mitotic index, of hepatoma transplants in mice after partial hepatectomy. Trotter, 778

Mixed agglutination reaction, in normal and maligant cells. Coombs, 1198

Mixed antiglobulin reaction, in normal and malignant cells. Coombs, 1198

Miyono adenocarcinoma, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, mouse, transplantability after frozen storage. Sugiura, 496

Mold, inhibition of Ehrlich ascites tumor by nucleoside from, called cordycepin. Jagger, Kredich, and Guarino, 216

Moloney virus, leukemia induced with, in mice, response to drug therapy. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803

Monofluoromethotrexate, tumor and marrow damage from, in mice bearing 6C3HED lymphosarcoma. Vogel, 743

Moore sarcoma No. 1, antitumor activity of cytoxan against, in rat. Sugiura, Schmid, and Schmid, 1412

Morris hepatoma 3683, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522
——, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in, in rat. Kizer and Chan, 489
——, studies on cachexia of rats bearing. Rechcigl, Grantham, and Greenfield, 238

Morris hepatoma 3924-A, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in, in rat. Kizer and Chan, 489

Morris hepatoma 5123, carbohydrate enzymes in. Weber, Banerjee, and Morris, 933
——, carbohydrate metabolism in. Weber, Morris, Love, and Ashmore, 1406
——, effect of dietary protein on inducible enzymes in, in rat. Pitot, Potter, and Morris, 1001
——, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522
——, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in, in rat. Kizer and Chan, 489
——, metabolism of drugs *in vitro* by, in rat. Adamson and Fouts, 667
——, rat, tryptophan pyrrolase and tyrosine α-ketoglutarate transaminase in. Pitot and Morris, 1009
——, sublines A, B, and C, activities of deoxycytidylate deaminase and thymidylate synthetase in. Maley and Maley, 1421
——, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

Murphy-Sturm lymphosarcoma. *See* Lymphosarcoma Murphy-Sturm.

Muscle, leg, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673
——, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118

Mustards, phenylalanine, efficacy against mouse melanoma. Luck, 262

Mycotic agents, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

Myleran, effect on nucleic acid biosynthesis in mouse leukemia. Trams, Nadkarni, and Smith, 567
——, incorporation into DNA of regenerating liver and mouse ascites tumors. Trams, Nadkarni, and Smith, 560
——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Myosin, test for, in rhabdomyosarcomas, by fluorescent antibody technic. Hiramoto, Jurandowski, Bernecky, and Pressman, 383

α-Naphthylisothiocyanate, intoxication of rats by, and fibrogenesis in the liver. Hutterer, Rubin, Singer, and Popper, 206

Nelson ascites tumor, mouse, transplantability after frozen storage. Sugiura, 496

Neoplasms. *See* Tumors.

Neoprontosil, metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

New South Wales koala. *See* Koala.

Niacin antagonist, 6-aminonicotinamide and Adenocarcinoma 755 enzymatic systems. Dietrich and Martin, 361

***p*-Nitrobenzoic acid,** metabolism in normal and tumorous liver, in rat. Adamson and Fouts, 667

Nitrogen, concentration in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232
——, content in Morris hepatoma 5123 cell, decreased compared with control liver. Weber, Banerjee, and Morris, 933
——, effect on enzymatic pattern of Strain L cells. Adebonojo, Bensch, and King, 252
——, in normal and neoplastic tissue cell fractions. Aisenberg, 295
——, retention by normal and tumor-bearing rats. Rechcigl, Grantham, and Greenfield, 238

Nitrogen mustard. *See* Methylbis(β-chlorethyl)amine.

Nitromin, cytoxan more effective as antitumor agent than. Sugiura, Schmid, and Schmid, 1412

Novikoff hepatoma, activities of deoxycytidylate deaminase and thymidylate synthetase in. Maley and Maley, 1421
——, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522
——, 5-hydroxytryptophan decarboxylase and serotonin deaminase activity in, in rat. Kizer and Chan, 489
——, metabolism of drugs *in vitro* by, in rat. Adamson and Fouts, 667
——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, rat, purine metabolism *in vivo* in. Wheeler and Alexander, 390
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat, sonicates of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407
——, transplantable, not stained by fluorescein-labeled antibody to rat liver microsomes. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372
——, tryptophan metabolism in. Petasnick, Brown, and Price, 1400

Nuclei. *See also* Cell fractionation.
——, adenosine triphosphatase activity of, from mouse mammary adenocarcinoma. Miller and Goldfeder, 64
——, liver and tumor, ultrastructure of nuclear envelope. Barton, 198

Nucleic acids. *See also* Deoxyribonucleic acid and Ribonucleic acid.
——, adenine and guanine metabolism in normal and leukemic human leukocytes. Shapira, Bornstein, Wells, and Winzler, 265
——, binding of chloroquine mustard to, *in vitro*. Rutman, Steele, and Price, 1124
——, biosynthesis of, effect of 6-chloropurine on, in rat liver *in vitro*. Duggan, Weigert, and Titus, 1047
——, effect of antitumor compounds on precursor utilization for synthesis of pyrimidines. Eidinoff, Knoll, Marano, and Klein, 1377
——, effect of thioTEPA on synthesis of, in tumor-bearing mice. Pradhan, West, Baird, and Steward, 984
——, effects of 4-aminopyrazolo(3,4-*d*)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-*d*)pyrimidine on purine metabolism in ascites tumors. Henderson and Junga, 173
——, from isologous newborn, adult, and neoplastic thymus, chromatographic fractionation of. Smith and Kaplan, 1148
——, incorporation of 6-mercaptopurine-S^{35} into, in transplantable mouse tumors. Bieber, Deitrich, Elion, Hitchings, and Martin, 228
——, interaction of alkylating agents with, in mouse ascites lymphomas. Trams, Nadkarni, and Smith, 560
——, mechanism of action of 6-thioguanine, in mouse. LePage and Jones, 1590
——, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine in normal and neoplastic tissues. Henderson and Junga, 118
——, of Ehrlich cells, alkylation of, by chloroquine mustard and nitrogen mustard, *in vitro*. Rutman, Steele, and Price, 1134

5′-Nucleotidase, adrenal, activity increased by Sarcoma 180 growth. Hilf, Breuer, and Borman, 1439
——, liver, activity elevated by tumor growth. Hilf, Breuer, and Borman, 1439

Nucleotidases, activity in Sarcoma 180, in mice treated with 6-mercaptopurine. Fodor, Clarke, and Bodansky, 232

Obituary, Mildred Schram. Shrigley, 712
——, Jerome T. Syverton. Scherer, 825

Octoiodofluorescein-I^{131}, localization in mouse brain tumors. Tocus and Okita, 201

Officers, American Association for Cancer Research, 1907–1961. Triolo and Riegel, 137

Oils, in induction of experimental subcutaneous cavity of scalp of mouse. Goldie, Walker, Avery, Houston, and McIver, 1113

Olive oil, in inducing experimental subcutaneous cavity of scalp of mouse. Goldie, Walker, Avery, Houston, and McIver, 1113

Orotic acid, incorporation into nucleic acids of leukemic cells in culture. Pasternak, Fischer, and Handschumacher, 110
——, inhibition of dihydroorotase in Ehrlich ascites cells by. Bresnick and Hitchings, 105

Orotic acid-C^{14}, incorporation into nucleic acids of mouse leukemia. Trams, Nadkarni, and Smith, 567
——, utilization for pyrimidine synthesis in rat tissues following fluorinated pyrimidines. Eidinoff, Knoll, Marano, and Klein, 1377

Orotic acid-6-C^{14}, incorporation into protein of L-1 mouse tumor inhibited by thioTEPA. Pradhan, West, Baird, and Steward, 984

Orotic acid-7-C^{14}, in studies of human pyrimidine metabolism after therapy with 6-azauridine. Cardoso, Calabresi, and Handschumacher, 1551

Orotidine, inhibition of dihydroorotase in Ehrlich ascites cells by. Bresnick and Hitchings, 105

Ovarian tumor formation, in parabiotic rats, endocrinology of. Johnson and Witschi, 783

Ovariectomy, of mice, and adrenal tumors, role of gonadotrophin in. Tullos, Kirschbaum, and Trentin, 730

Ovaries, tumors of, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 575

Oxidative phosphorylation, in normal and neoplastic mitochondria and homogenates of rat tissues. Aisenberg, 304

P-815 ascites mast-cell neoplasm, mouse, biochemical and morphologic changes in, with cyclophosphamide. Mengel and Kelly, 1545

Pancreas, hemangiomas induced in, by urethan, in mice. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71

Papanicolaou method, compared with acridine orange fluorescence microscope method for cytodiagnosis of cancer. Bertalanffy, 422

Parabiosis, of mice, ovariectomy and adrenal tumors along with. Tullos, Kirschbaum, and Trentin, 730

Parabiotic rats, ovarian tumor formation in. Johnson and Witschi, 783

Parathyroid, tumors of, in control and irradiated rats. Lindsay, Sheline, Potter, and Chaikoff, 9

Permeability, of normal liver and of hepatoma, to sucrose and inulin, in rat. Humphrey, 1573

Permeability coefficient, smaller in induced hepatoma than in rat liver, in study of potassium flux. Humphrey, 1566

Phascolarctus c. cinereus, acute leukemia in. Heuschele and Hayes, 1394

Phase contrast microscopy, in study of cultured human melanoma cells. Rose, 706

Phenanthrene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510
——, levels in mammary and fat tissues, in rat, after feeding of. Bock and Dao, 1024

Phenylalanine mustard, response of normal and tumorous human tissues to, in culture, Cobb, Walker, and Wright, 583
——, efficacy against mouse melanoma. Luck, 262

Phenylalkancarboxylic acids, peptides, amides, and esters of chloroethylamino derivatives of, as antitumor compounds. Larionov, 99

2-Phenylphenanthrene-3,2′-dialdehyde, zero-time binding to mouse skin proteins. Somerville and Heidelberger, 591

Phloretin, effect on respiration of ascites tumor cells *in vitro*. Dietrich and Friedland, 502

Phosphate-P^{32}, effect of 6-chloropurine on metabolism of, in rat liver. Duggan, Weigert, and Titus, 1047
——, effect of polylysine on incorporation of, into Ehrlich ascites tumor cells. Kornguth and Stahmann, 907
——, incorporation into nucleic acids of mouse leukemia. Trams, Nadkarni, and Smith, 567
——, incorporation into tumor nucleic acids inhibited by psicofuranine. Magee and Eberts, 611

Phosphoglucomutase, activity decreased in Morris hepatoma 5123. Weber, Morris, Love, and Ashmore, 1406
——, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 933

6-Phosphogluconate dehydrogenase, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 933

Phosphohexoseisomerase, activity in normal rat liver and hepatoma. Weber, Banerjee, and Morris, 933

Phospholipide, in epidermis and dermis of mice during carcinogenesis by methylcholanthrene. Carruthers and Davis, 82

Phosphorylation, in normal and neoplastic mitochondria and homogenates of rat tissues. Aisenberg, 304

Photoinactivation, dye-sensitized, of tumor cells *in vitro*. Bellin, Mohos, and Oster, 1365

Physiological variability, genetic aspects of. Wolff, 1119

Phytohemagglutinin, effect of mitosis of human leukocytes *in vitro*. Nowell, 1518

Pig kidney, cultured cells from, chromosome variation in. Ruddle, 885

Pitt 61, embryonal carcinoma, effect of colchicine and x-radiation on differentiation of, in hamsters bearing. Midgley and Pierce, 545

Pituitary, effect of gonadotrophin on rat ovaries and ovarian tumor formation. Johnson and Witschi, 783
——, enzymes of, effects of estrogens on, in rat. Baltrus and Melchior, 1360
——, role of mammotrophin in mammary tumor induction in mice. Haran-Ghera, 790
Pituitary isograft, effects on mammary tumorigenesis in mice. Liebelt and Liebelt, 86
Pituitary thyrotropic tumors, mouse, survival of implants during prolonged suppression by thyroid hormone. Werner and Grinberg, 522
Pituitary thyrotropic tumor strain L23, autonomous, nonresponsive, effect of thyroid hormone on growth of. Werner and Grinberg, 522
Pituitary thyrotropic tumor strain L24, autonomous, responsive, effect of thyroid hormone on growth of. Werner and Grinberg, 522
Pituitary thyrotropic tumor strain 3052, dependent, effect of thyroid hormone on growth of. Werner and Grinberg, 522
Pituitary thyrotropic tumor strain 4183, dependent, effect of thyroid hormone on growth of. Werner and Grinberg, 522
Pituitary tumors, mammotropic, changes in hormone sensitivity of, during progression from normal to autonomous. Clifton and Furth, 913
——, mammotropic, induced in rodents by x-rays. Yokoro, Furth, and Haran-Ghera, 178
Polydactylism, in mice, reversal of, and changes of tumor susceptibility. Isherwood and Strong, 796
Polyethelene powder, lack of effect on carcinogenic process, in rat. Oppenheimer, Willhite, Danishefsky, and Stout, 132
Polylysine, effect on leakage and retention of compounds by Ehrlich ascites cells. Kornguth and Stahmann, 907
Polymer, powdered, lack of effect on carcinogenic process, in rat. Oppenheimer, Willhite, Danishefsky, and Stout, 132
Polyoma virus-induced tumors, in mice, transplantation of. Sjögren, Hellström, and Klein, 329
Potassium content, of Ehrlich ascites tumor cells, effect of polylysine on. Kornguth and Stahmann, 907
Potassium flux, comparison, in hepatomas and normal liver, in rat. Humphrey, 1566
Prednisolone, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221
Prednisone, nonspecific antitumor effect on H.Ep. #3 tumor in mice. Merker, Andio, and Mantel, 869
Pregnancy, effect on level of polynuclear hydrocarbons in rat mammary glands after oral administration. Bock and Dao, 1024
Preservation, by freezing, of enzymatically prepared tumor cell suspensions, and use in tumor transplantation. Vaitkevicius, Simpson, and Brennan, 187
Proflavine, photoinactivation of tumor cells *in vitro* sensitized by. Bellin, Mohos, and Oster, 1365
Promotion, of tumors, by Euphorbia latices. Roe and Peirce, 338
7-n-Propylbenz[*a*]anthracene, concentration in mouse skin after cutaneous application. Bock and Burnham, 510
Prostate, spontaneous carcinoma of, in dog, histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761
Proteins, effect of thioTEPA on synthesis of, in tumor-bearing mice. Pradhan, West, Baird, and Steward, 984
——, metabolism in Walker carcinoma 256 cell cultures. Green and Miller, 1034
——, of Ehrlich cells, alkylation of, by chloroquine mustard and nitrogen mustard, *in vitro*. Rutman, Steele, and Price, 1134
——, of Walker tumor, labeling in, following injection of radioactive albumin. Busch, Fujiwara, and Firszt, 371
——, serum, uptake by neoplastic liver cells with fluorescein-labeled antibodies. Cohen, Beiser, and Hsu, 1510
Psicofuranine, antitumor effect on tumor-bearing rats *in vivo*. Magee and Eberts, 611
Pulmonary adenomatosis, induced in hamster by urethan Toth, Tomatis, and Shubik, 1537
Purine, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773
Purine analogs, clinical evaluation of thioguanine, Krakoff, Ellison, and Tan, 1015
——, therapeutic evaluation of, as anticancer agents. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
Purine metabolism, of rat liver, effects of 6-chloropurine and 6-chlorouric acid on. Duggan, Weigert, and Titus, 1047
Purine riboside, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323
Purines, anabolism and catabolism of, by minced tissues of mice and rats. Wheeler and Alexander, 399
——, and purine nucleotides, catabolism by sonicates of various rat and mouse tissues. Wheeler and Alexander, 407
——, biosynthesis in Novikoff tumor cells *in vitro*, inhibited by diazo-oxo-norleucine. Moore and Hurlbert, 257
——, incorporation of carbon dioxide into, in Jensen and JA sarcomas *in vitro*. McCoy, Maxwell, and Kruse, 997
——, in purine synthesis in ascites tumor cells, in mice. LePage and Jones, 642
——, metabolism *in vivo* in various tissues in mice and rats. Wheeler and Alexander, 390
Purinethiols, as feedback inhibitors of purine synthesis in ascites tumor cells. LePage and Jones, 642
Puromycin, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773
Puromycin aminonucleoside, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773
Pyrimidine analogs, fluorinated, initial studies with 5-iodo-2′-deoxyuridine. Calabresi, Cardoso, Finch, Kligerman, von Essen, Chu, and Welch, 550
Pyrimidine deoxyribonucleosides, halogenated, review on metabolic approaches to chemotherapy. Welch, 1475
Pyrimidines, biosynthesis in Novikoff tumor cells *in vitro*, inhibited by diazo-oxo-norleucine. Moore and Hurlbert, 257
——, biosynthesis of, and feedback control in Ehrlich ascites cells. Bresnick and Hitchings, 105
——, effect of antitumor compounds on precursor utilization for synthesis of. Eidinoff, Knoll, Marano, and Klein, 1377
——, incorporation of carbon dioxide into, in Jensen and JA sarcomas *in vitro*. McCoy, Maxwell, and Kruse, 997
——, metabolism, human, alterations after treatment with 6-azauridine. Cardoso, Calabresi, and Handschumacher, 1551
——, metabolism, in leukemic cells resistant to 6-azauridine. Pasternak, Fischer, and Handschumacher, 110
Pyronin B, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Rabbit epiderm, and carcinoma, adhesiveness and stickiness of cell surface of. Coman, 1436
Rabbit serum, normal, cytotoxic for Walker 256 tumor cells in tissue culture. Tuttle and Foushee, 735
Radiation. *See also* Irradiation and X-radiation.
——, dose-response relation in cancer induced by, in human. Upton, 717
Radiothyroidectomy, effect on implants of mouse pituitary thyrotropic tumors. Werner and Grinberg, 522
Respiration, inhibition of, induced by glucose, *review*. Ibsen, 829
——, in normal and neoplastic mitochondria. Aisenberg, 295
——, of ascites tumor cells, effect of various synthetic estrogens *in vitro*. Dietrich and Friedland, 502
——, of lymphoblasts *in vitro*. Holmburg, Bos, deBruyn, and Emmelot, 353
Reticuloendothelial interference, effect on hepatic metastases. Fisher and Fisher, 275

Reticuloendothelial system, and host reaction to neoplasia. Old, Benacerraf, Clarke, Carswell, and Stockert, 1281

Review, cell differentiation as determinant of susceptibility to virus carcinogenesis. Kaplan, 981
——, historical, American Association for Cancer Research. Triolo and Riegel, 137
——, immunological investigations on cancer. Milgrom, 862
——, metabolic approaches to cancer chemotherapy. Welch, 1475
——, of effects of underfeeding on incidence and growth of tumors in rats and mice. White, 281
——, patterns of metastasis in lung cancer. Onuigbo, 1077
——, preclinical screening for chemotherapy of cancer. Goldin, Venditti, and Mantel, 1334
——, symposium on the possible role of immunology in cancer. American Cancer Society, 1165
——, symposium paper on chemotherapy and chemopraxis of cancer. Holland, 1086
——, symposium paper on drug response between animal and human cancer. Skipper, 1100
——, symposium paper on environmental carcinogenesis. Hueper, 842
——, symposium paper on epidemiology of cancer. Wynder, 858
——, the Crabtree effect. Ibsen, 829
——, viral carcinogenesis, symposium paper. Dulbecco, 975

Rhabdomyosarcomas, immunochemical differentiation of. Hiramoto, Jurandowski, Bernecky, and Pressman, 383

Ribonucleases, of mouse ascites tumors. Colter, Kuhn, and Ellem, 48

Ribonucleic acid. *See also* Nucleic acids.
——, biosynthesis of cytosine and purines of, in Novikoff tumor cells, inhibited by diazo-oxo-norleucine. Moore and Hurlbert, 257
——, distribution pattern for normal and tumor-containing thymus. Smith and Kaplan, 1148
——, in normal and neoplastic tissue cell fractions. Aisenberg, 295

Ridgway osteogenic sarcoma, antitumor activity of cytoxan against, in mouse. Sugiura, Schmid, and Schmid, 1412
——, mouse, transplantability after frozen storage. Sugiura, 496

Rose bengal, photoinactivation of tumor cells *in vitro* sensitized by. Bellin, Mohos, and Oster, 1365

Rous chicken sarcoma, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, lack of effect of mixed bacterial toxins on. Havas and Donnelly, 17
——, transplantability after frozen storage. Suigura, 496

Salmonella typhosa Ty2, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

Sarcolysin, cytoxan more effective as antitumor agent than. Sugiura, Schmid, and Schmid, 1412
——, derivatives of, as possible antitumor compounds. Larionov, 99

Sarcoma, methylcholanthrene-induced, in mouse, slight inhibitory effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, mouse, induced, effect of corticosteroids on. Nakai, 221

Sarcoma 37, ascites tumor, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48
——, solid and ascitic, effects of uncoupling agents on glycine uptake by. Ellis and Scholefield, 650
——, vaccinia hemagglutinin inhibitor in ascites of. Wolin, 1030

Sarcoma 180, antitumor effect of cucurbitacins on, in mice *in vivo.* Gitter, Gallily, Shohat, and Lavie, 516
——, ascites, dye-sensitized photoinactivation of, *in vitro.* Bellin, Mohos, and Oster, 1365
——, ascites, effect of purinethiol derivatives on mice *in vivo.* LePage and Jones, 642
——, ascites, effect of tumor-inhibitory compounds on transplantability of. Mihich, Mulhern, Hornung, and Nichol, 323
——, ascites cells, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118
——, ascites, mouse, ribonuclease activity of. Colter, Kuhn, and Ellem, 48
——, CCRF cell line of, effect of cytoxan on culture of. Foley, Friedman, and Drolet, 57
——, damage to, compared with that to bone marrow, in chemotherapy studies on mice. Vogel, 636
——, effect of caloric restriction on growth of, in mice. Laster, Schabel, Skipper, Wilcox, and Thomson, 895
——, effect of 6-thioguanine on survival of mice bearing. LePage and Jones, 1590
——, effects of 4-aminopyrazolo(3,4-*d*)pyrimidine and of 1-methyl-4-aminopyrazolo(3,4-*d*)pyrimidine on nucleic acid purine metabolism in. Henderson and Junga, 173
——, effect on adrenal adenine nucleotide-metabolizing enzymes. Hilf, Breuer, and Borman, 1439
——, immunity to, and the induction of leukemia, in mice. dePasqualini, Holmberg, Rabasa, and Pavlovsky, 387
——, influence of *B. pertussis* on transplantation of, in mouse. Malkiel and Hargis, 1461
——, lack of effect of mixed bacterial toxins on, in mouse. Havas and Donnelly, 17
——, large-scale chemotherapy screening against, in tissue culture. Toplin, 1042
——, mice bearing, treated with 6-mercaptopurine, and enzyme, DNA, and nitrogen concentrations in. Fodor, Clarke, and Bodansky, 232
——, mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399
——, mouse, compared with four human cell lines as to drug sensitivity in agar plate assay. Schuurmans, Duncan, and Olson, 773
——, mouse, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, mouse, purine metabolism *in vivo* in. Wheeler and Alexander, 390
——, mouse, sonicates of, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407
——, mouse, tumor-marrow index for. Vogel. 1450
——, reproducibility of tumor system employed in CCNSC program, with mice bearing. Schabel, Skipper, White, and Laster, 700
——, solid and ascites, mouse, transplantability after frozen storage. Sugiura, 496
——, subcutaneous transplants of, in mice, mammary duct stimulation by. Argyris and Argyris, 75
——, vaccinia hemagglutinin inhibitor in ascites of. Wolin, 1030

Sarcoma Black (SBL1), antitumor effect of cucurbitacins on, in mice *in vivo.* Gitter, Gallily, Shohat, and Lavie, 516

Sarcoma MA 387, mouse, effect of cytoxan on. Sugiura, Schmid, and Schmid, 1412
——, mouse, transplantability after frozen storage. Sugiura, 496

Sarcoma MWG, methylcholanthrene-induced, in mice, immunological study of. Wigzell, 365

Sarcoma T241, mouse, transplantability after frozen storage. Sugiura, 496
——, antitumor activity of cytoxan against, in mouse. Sugiura, Schmid, and Schmid, 1412

Sarcomycin derivatives, antitumoral action of. Caputo, Brunori, and Giuliano, 1499

Schram, M., *obituary.* Shrigley, 712

Screening, preclinical, for chemotherapy, *review.* Goldin, Venditti, and Mantel, 1334
——, tissue culture system in large-scale cancer chemotherapy. Toplin, 1042

Serine dehydrase, effect of dietary protein on, in rat liver and Hepatoma 5123. Pitot, Potter, and Morris, 1001

Serotonin content, of mast-cell neoplasm, during treatment with cyclophosphamide, in mice. Mengel and Kelly, 1545

Serotonin deaminase, in transplanted hepatomas and induced rat liver tumor. Kizer and Chan, 489

Serous fluid, of experimental subcutaneous cavity in mouse, free tumor cell growth in. Goldie, Walker, Avery, Houston, and McIver, 1113

Serratia marcescens, and *Streptococcus pyogenes,* effect of preparations from, on mouse tumors. Havas and Donnelly, 17

——, lipopolysaccharide of, Sarcoma 180 in mouse. Malkiel and Hargis, 1461

Serum, blood, from cytoxan-treated rats, inhibitory for mammalian cell culture. Foley, Friedman, and Drolet, 57

——, guinea pig, inhibitory activity of, on Walker carcinosarcoma 256 in rat. Kwak, Jameson, Ryan, and Kurtz, 44

——, rabbit, normal, cytotoxic for Walker 256 tumor cells in tissue culture. Tuttle and Foushee, 735

——, rat, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522

Serum albumin, radio-iodinated, in rat liver and hepatoma slices, compared with sucrose and inulin. Humphrey, 1573

Serum cholinesterase, reduced activity in guinea pig with locally implanted human tumor. LaMotta, Babbott, and Wetstone, 749

Serum lactic dehydrogenase, in human, electrophoresis of. Hill, 271

Serum proteins, uptake by neoplastic liver cells with fluorescein-labeled antibodies. Cohen, Beiser, and Hsu, 1519

Sex, lack of effect on level of polynuclear hydrocarbons in rat mammary glands after oral administration. Bock and Dao, 1024

Shwartzman phenomenon, possible role in mechanism of bacterial toxin tumor therapy. Havas and Donnelly, 17

Sidransky ethione-induced hepatoma, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522

Simpson reticulum-cell sarcoma, transplantable, not stained by fluorescein-labeled antibody to rat liver microsomes. Hiramoto, Bernecky, Jurandowski, and Pressman, 1372

Skin, binding of hydrocarbons to proteins of, zero-time studies. Somerville and Heidelberger, 591

——, carcinogenesis of, induced by methylcholanthrene, and changes in epidermal hydroxyproline and tyrosine. Fels and Greco, 40

——, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673

——, fractionation of proteins of, to which hydrocarbons are bound, in mouse. Davenport, Abell, and Heidelberger, 599

——, mouse, concentration of hydrocarbons in, after cutaneous application. Bock and Burnham, 510

——, sebaceous tumors of, induced in hamsters with oral 20-methylcholanthrene. Della Porta, 575

——, undergoing carcinogenesis, lipide composition of epidermis and dermis, in mice. Carruthers and Davis, 82

Skin tumors, in mice, induced with tobacco tar and methylcholanthrene, effect of stilbestrol. Svoboda, 993

——, melanotic, induced in hamster by urethan. Toth, Tomatis, and Shubik, 1537

——, mouse, induced by benzpyrene, irradiation of and sulfur-35 uptake. Duhig, 485

——, surgical trauma and dibenzpyrene in production of. Gottfried, Molomut, and Patti, 658

Sodium content, of Ehrlich ascites tumor cells, effect of polylysine on. Kornguth and Stahmann, 907

Sodium formate-C^{14}, incorporation into protein of L-1 mouse tumor inhibited by thioTEPA. Pradhan, West, Baird, and Steward, 984

Sonicates, of rat and mouse tissues, catabolism of purines and purine nucleotides by. Wheeler and Alexander, 407

Specificity index, in preclinical screening, *review.* Goldin, Venditti, and Mantel, 1334

Spleen, mouse, metabolism of 4-aminopyrazolo(3,4-*d*)pyrimidine and related compounds in. Henderson and Junga, 118

——, normal, quantitative and histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761

——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304

——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295

——, rat, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

——, rat and mouse, anabolism and catabolism of purines by minced. Wheeler and Alexander, 399

——, weight reduced by cortisone, in rats and mice. Malejka, Argus, and Ray, 673

Sporotrichum Schenckii, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

Statistical methods, and steroid therapy of mice bearing human tumor. Merker, Anido, and Mantel, 869

——, used in evaluating host weight change difference vs. tumor inhibition, in mice. Laster, Schabel, Skipper, Wilcox, and Thomson, 895

Statistics, survival time analysis for treatment evaluation in cancer therapy. Kodlin, 1103

Steroids. *See also* under specific steroids.

——, inhibition of human leukocyte mitosis by prednisolone *in vitro.* Nowell, 1518

——, therapy of mice bearing H.Ep. #3 tumor with. Merker, Anido, and Mantel, 869

——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Stickiness, and adhesiveness, of cell surface of rabbit epiderm and V_2 carcinoma. Coman, 1436

Stilbestrol, effect on skin tumors induced in mice with tobacco tar and methylcholanthrene. Svoboda, 993

Stomach, carcinomas of forestomach induced in hamster by urethan. Toth, Tomatis, and Shubik, 1537

——, cortisone effect on sulfonamide distribution in rats and mice. Malejka, Argus, and Ray, 673

Storage, frozen, of various solid and ascites tumors. Sugiura 496

——, of enzymatically prepared tumor cell suspensions by freeze-preservation. Vaitkevicius, Simpson, and Brennan, 187

Strain. *See also* under specific name—e.g., HeLa.

Strain FL cells, human, micromorphology of cultures of, following high hydrostatic pressure. Landau and McAlear, 812

Strain L cells, clone 929, cytoplasmic enzymes not released from, *in vitro.* Holmberg, 1386

——, effect of anaerobiosis on enzymatic pattern of. Adebonojo, Bensch, and King, 252

——, virus-like particles in association with, electron microscopy. Dales and Howatson, 193

Strain L-fibroblasts, growth in diffusion chambers in resistant hosts, in mice. Gabourel, 506

Strain PK cells, chromosome variation in. Ruddle, 885

Streptococcus pyogenes, and *Serratia marcescens,* effect of preparations from, on mouse tumors. Havas and Donnelly, 17

——, relative immunologic capacity of leukemic mice to. Murphy and Syverton, 921

Streptovitacin A, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Strophanthin K, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Styrylquinoline, derivative of, effect on glycolysis of lymphoblasts *in vitro.* Homburg, Bos, deBruyn, and Emmelot, 353

Subcommittee on Carcinogenesis, Food Protection Committee. Problems in the evaluation of carcinogenic hazard from use of food additives, 429

Succinate oxidation, in normal and neoplastic mitochondria. Aisenberg, 295

Succinic dehydrogenase, absent in Walker carcinoma, by histochemistry. Fisher and Fisher, 527

Succinoxidase, in rat pituitary, effects of estrogens on. Baltrus and Melchior, 1360

Sucrose, permeability of normal liver and of hepatoma to, in rat. Humphrey, 1573

Sulfhydryl groups, soluble, correlated with histopathology in hamster cheek pouch during carcinogen application. Morris, Scott, and Reiskin, 1352

Sulfonamide, effect of cortisone on distribution of, in rats and mice. Malejka, Argus, and Ray, 673

Sulfur-35, uptake by connective tissues surrounding irradiated mouse skin tumors. Duhig, 485

Sulfur mustard, incorporation into DNA of regenerating liver and mouse ascites tumors. Trams, Nadkarni, and Smith, 560

Supernatant fraction. *See* Cell fractionation.

Supplements. *See also* Chemotherapy.
——, Cancer Chemotherapy Screening Data IX. No. 3, Part 2, CS 1
——, Cancer Chemotherapy Screening Data X. No. 6, Part 2, CS 161
——, Cancer Chemotherapy Screening Data XI. No. 8, Part 2, CS 343
——, Cancer Chemotherapy Screening Data XII. No. 10, Part 2, CS 617

Surgical trauma, co-carcinogenic with dibenzpyrene in mouse. Gottfried, Molomut, and Patti, 658

Survival time analysis, in cancer therapy. Kodlin, 1103

Symposium, cell differentiation as determinant of susceptibility to virus carcinogenesis. Kaplan, 981

——, immunology and cancer, regression of autochthonous tumors. Eisen, 1275
——, immunology and cancer, reticuloendothelial system and neoplasia. Old, Benacerraf, Clarke, Carswell, and Stockert, 1281
——, immunology and cancer, self-recognition and autoantibody formation. Witebsky, 1216
——, immunology and cancer, summary of informal discussion, first session. Bang, 1184
——, immunology and cancer, transplanted tumor as research tool. Kaliss, 1203
——, immunology and cancer, tumor viruses and cell behavior. Rubin, 1244
——, immunology and cancer, whither bound. Grabar, 1318
——, immunology and cancer, whither bound. Taliaferro, 1323
——, viral carcinogenesis. Dulbecco, 975

Syverton, J. T., *obituary*. Scherer, 825

TA3 ascites tumor, effect of purinethiol derivatives on mice *in vivo*. LePage and Jones, 642
——, effect of 6-thioguanine on survival of mice bearing. LePage and Jones, 1590
——, established as permanent cell strains in tissue culture. Guerin and Morgan, 378
——, ribonuclease activity of. Colter, Kuhn, and Ellem, 48

TEM. *See* Triethylenemelamine.

TESPA. *See* Triethylenethiophosphoramide.

Testis, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

Testosterone, alone or with diethylstilbesterol, effect on Adenocarcinoma 755 metabolism. Dietrich and Martin, 361
——, inhibition of irradiation-induced leukemia in mice by. Wasi and Block, 463

Tetrahydroelatericin A, antitumor effect tested, in mice. Gitter, Gallily, Shohat, and Lavie, 516

Therapeutic index, in preclinical screening, *review*. Goldin, Venditti, and Mantel, 1334.

Thiadiazole phosphoramide, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Thioguanine, compared with thioguanosine, clinical evaluation. Krakoff, Ellison, and Tan, 1015
——, effect alone and with purinethiols on ascites tumor cells *in vivo*. LePage and Jones, 642
——, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690
——, mechanism of action of, in mouse. LePage and Jones, 1590
——, variations in sensitivity to, among five mammalian cell lines used in agar plate assay. Schuurmans, Duncan, and Olson, 773

Thioguanosine, clinical evaluation of, compared with thioguanine in leukemias. Krakoff, Ellison, and Tan, 1015
——, effectiveness against Carcinoma 755, in mice. Schabel, Montgomery, Skipper, Laster, and Thomson, 690

Thionine, photoinactivation of tumor cells *in vitro* sensitized by. Bellin, Mohos, and Oster, 1365

ThioTEPA. *See* N,N′, N″-Triethylenethiophosphoramide.

Thorotrast, reticuloendothelial interference with, effect on hepatic metastases. Fisher and Fisher, 275

Threonine dehydrase, effect of dietary protein on, in rat liver and Hepatoma 5123. Pitot, Potter, and Morris, 1001

Thymidine, exogenous, incorporation into DNA of mammalian cells *in vitro*. Kriss and Révész, 1141
——, turnover in mouse marrow and intestine, and response to 5-fluorouracil, *in vivo*. Field, Kriss, and Tung, 2

Thymidine-2-C^{14}, uptake in DNA synthesis, in normal and neoplastic tissues. Aisenberg, 1560

Thimidylate synthetase, in normal and neoplastic rat liver. Maley and Maley, 1421

Thymus, and irradiation-induced leukemia in mice, effect of testosterone. Wasi and Block, 463
——, nucleic acids from isologous newborn, adult, and neoplastic thymus, chromatographic fractionation of. Smith and Kaplan, 1148
——, weight reduced by cortisone, in rats and mice. Malejka, Argus, and Ray, 673

Thyroid gland, of rat, induction of neoplasms in, by x-radiation of gland. Lindsay, Sheline, Potter, and Chaikoff, 9

Thyroid hormone, effect on implants of mouse pituitary thyrotropic tumors. Werner and Grinberg, 522

Thyrotropic tumors, pituitary, mouse, survival of implants during prolonged suppression by thyroid hormone. Werner and Grinberg, 522

Time-lapse cinematography, of human melanomas in tissue culture. Rose and Stehlin, 1455

Tissue culture, *See also* Culture.

——, chromosome variation in cell populations derived from pig kidney. Ruddle, 885

——, growth and morphology of transplanted melanotic and amelanotic hamster tumors in. Rosenberg, Kodani, and Rosenberg, 632

——, growth of L-fibroblasts in diffusion chambers in resistant mice *in vivo.* Gabourel, 506

——, of Krebs-2 ascites carcinoma, chromosome number when cultured *in vivo* and *in vitro.* Ely and Gray, 1020

——, of leukemia L5178Y cells, mouse, requirement for L-asparagine. Haley, Fischer, and Welch, 532

——, of nonmalignant and malignant lymphoblasts, glycolytic and respiratory properties of. Homburg, Bos, deBruyn, and Emmelot, 353

——, of Strain L cells, effect of nitrogen on enzymatic pattern. Adebonojo, Bensch, and King, 252

——, TA_3 and Ehrlich ascites tumors established as permanent cell strains. Guerin and Morgan, 378

——, transplantation of cell lines from, to animals. Manuelidis, 876

Tissue culture system, in large-scale cancer chemotherapy screening. Toplin, 1042

Tissue distribution, of radioactivity after administration of 4-aminopyrazolo(3,4-*d*)pyrimidine-C^{14} in mouse. Henderson and Junga, 118

Tissues, normal, quantitative and histochemical analysis of heavy metals in, in rat. Arnold and Sasse, 761

Tobacco tar, skin tumors induced in mice with, lack of effect of stilbestrol. Svoboda, 993

Toxins, mixed bacterial, in treatment of induced, spontaneous, and transplanted mouse tumors. Havas and Donnelly, 17

Toxohormone preparation, composition and properties of, from human malignant tissues. Yunoki and Griffin, 537

TPN-linked dehydrogenase, activity in human choriocarcinoma homogenates. Kellogg, 319

Transaminase, alanine-*a*-ketoglutarate, activity and growth of Walker tumor with cortisol. Rosen, Budnick, Solomon, and Nichol, 620

——, glutamic-oxalacetic, activities of liver and other tumors in the rat. Dyer, Gullino, Ensfield, and Morris, 1522

——, glutamic-oxalacetic, in rat pituitary, effects of estrogens on. Baltrus and Melchior, 1360

Transhydrogenase, estradiol-sensitive, activity in human choriocarcinoma homogenates. Kellogg, 319

Transplantability, of Sarcoma 180 ascites, effect of tumor-inhibitory agents on. Mihich, Mulhern, Hornung, and Nichol, 323

——, of various tumors after frozen storage. Sugiura, 496

Tranplantable animal cancer, as primary standard, *guest editorial.* Potter, 1331

Transplantation, effect of partial hepatectomy on subcutaneously transplanted hepatomas in mice. Trotter, 778

——, freeze-preservation of cell suspensions and use in, of tumors. Vaitkevicius, Simpson, and Brennan, 187

——, heterologous, of spontaneous leukemia from mice into newborn rats. Kirsten, Anderson, and Platz, 767

——, heterologous, of tissue culture lines to various animals. Manuelidis, 876

——, heterologous tissue, effect on adrenal adenine nucleotide-metabolizing enzymes. Hilf, Breuer, and Borman, 1439

——, of mouse sarcomas, changes in tumor susceptibility with reversal of polydactylism. Isherwood and Strong, 796

——, of polyoma virus-induced tumors in mice. Sjögren, Hellström, and Klein, 329

——, of Sarcoma 180 tumor in mice, mammary duct stimulation by. Argyris and Argyris, 75

——, of single pituitary isograft, into mice, effects on mammary tumorigenesis. Liebelt and Liebelt, 86

——, of spontaneous kidney tumor of the rat. Babcock and Southam, 130

——, of tumors in rats and mice, effect of underfeeding. White, 281

——, of varying tumor cell numbers, and effect of guinea pig serum, in Walker 256 rat tumor. Kwak, Jameson, Ryan, and Kurtz, 44

Trauma, surgical, as co-carcinogen, with dibenzpyrene, in mouse. Gottfried, Molomut, and Patti, 658

Triamcinolone, effect on methylcholanthrene-induced sarcomas in mice. Nakai, 221

Triethylenemelamine, C^{14}-labeled, incorporation into DNA of regenerating liver and mouse ascites tumors. Trams, Nadkarni, and Smith, 560

——, effect on mouse lung metastases, following intravenous injection of tumor cells. Kondo and Moore, 1396

——, effect on virus-induced mouse leukemia and transplantable leukemia. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803

——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

N,N′,N″-Triethylenethiophosphoramide, cytocidal effectiveness of, against Sarcoma 180 ascites. Mihich, Mulhern, Hornung, and Nichol, 323

——, effect on bone marrow and tumor tissue of mice treated with. Vogel, 636

——, effect on synthesis of protein and nucleic acids in tumor-bearing mice. Pradhan, West, Baird, and Steward, 984

——, response of normal and tumorous human tissues to, in culture. Cobb, Walker, and Wright, 583

——, tested against various mouse tumors with tumor-marrow index. Vogel, 1450

Triglyceride fatty acids, in epidermis and dermis of mice during carcinogenesis by methylcholanthrene. Carruthers and Davis, 82

Trypan blue staining, of cultured Walker 256 tumor cells, affected by normal rabbit serum. Tuttle and Foushee, 735

Tryptophan, effect of administration of, on tryptophan pyrrolase in rat liver and Hepatoma 5123. Pitot and Morris, 1009

——, excretion of metabolites of, during cyclophosphamide treatment of mast-cell neoplasm, in mouse. Mengel and Kelly, 1545

——, in modifying effect of vincaleukoblastine on dividing cells *in vivo.* Cutts, 168

——, metabolism, of rats, effect of feeding of 3′-methyl-4-dimethylaminoazobenzene on. Petasnick, Brown, and Price, 1400

Tryptophan pyrrolase, effect of dietary protein on, in rat liver and Hepatoma 5123. Pitot, Potter, and Morris, 1001

——, in rat liver and Hepatoma 5123. Pitot and Morris, 1009

——, rat liver, decreased after feeding of 3′-methyl-4-dimethylaminoazobenzene. Petasnick, Borwn, and Price, 1400

Tumor growth, and underfeeding, in rats and mice. White, 281

——, effect of varying implant cell numbers on, in rat. Kwak, Jameson, Ryan, and Kurtz, 44

——, immunological depression in mouse strain systems. Wigzell, 365

——, of Ehrlich ascites cells, inhibited by cordycepin. Jagger, Kredich, and Guarino, 216

——, of free cells in experimental subcutaneous cavity in mouse. Goldie, Walker, Avery, Houston, and McIver, 1113

Tumorigenesis. *See* Carcinogenesis.

Tumor induction, immunity to sarcoma and induction of leukemia in mice. dePasqualini, Holmberg, Rabasa, and Pavlovsky, 387

Tumor lipides, lipide hapten in gastrointestinal tract, in human. Graf, Rapport, and Brandt, 1532

Tumor-marrow index, laboratory evaluation of antineoplastic compounds. Vogel, 1450

Tumor progression, and chromosomes in development and cancer. Hauschka, 957

Tumor, promotion, by Euphorbia latices. Roe and Peirce, 338

Tumors, at various sites, induced in hamster by urethan. Toth, Tomatis, and Shubik, 1537
——, autochthonous, immune responses and regression of. Eisen, 1275
——, brain, mouse, localization of octoiodofluorescein-I^{131} in. Tocus and Okita, 201
——, changes in susceptibility, with reversal of polydactylism in mice. Isherwood and Strong, 796
——, damage to, compared with that to bone marrow, in chemotherapy studies on mice. Vogel, 636
——, host reaction to own cancer cells. Kidd, 1170
——, induced in hamsters, with oral 20-methylcholanthrene. Della Porta, 575
——, intestine, decreased following castration. Fortner, 1491
——, mammary, development of, accelerated in mice pretreated with tumor tissue and adjuvant. Hirsch and Iversen, 752
——, mouse, bacterial toxins in treatment of. Havas and Donnelly, 17
——, mouse, polyoma virus-induced, in mice, transplantation of. Sjögren, Hellström, and Klein, 329
——, passage of cells through capillaries. Zeidman, 38
——, pituitary mammotropic, hormone sensitivity changed, during progression from normal to autonomous. Clifton and Furth, 913
——, produced in rat by *N*-hydroxy-2-acetylaminofluorene. Miller, Miller, and Hartmann, 815
——, spontaneous, in dog or rat, incidence of. Subcommittee on Carcinogenesis, 429
——, transplantable, effects of uncoupling agents on glycine uptake by. Ellis and Scholefield, 650
——, transplantation of neoplastic cell lines to various animals. Manuelidis, 876
——, transplanted, as research tool in cancer immunology. Kaliss, 1203
——, ultrastructure of nuclear envelope of cells of. Barton, 198
——, viability of various tumors after frozen storage. Sugiura, 496
——, weight, statistical methods for analysis of. Merker, Anido, and Mantel, 869

Turpentine treatment, effect on adrenal adenine nucleotide-metabolizing enzymes. Hilf, Breuer, and Borman, 1439

Tyrosine, effect of administration of, on tyrosine α-ketoglutarate transaminase in rat liver and Hepatoma 5123. Pitot and Morris, 1009
——, epidermal, increased in induced epidermal carcinogenesis, in mice. Fels and Greco, 40

Tyrosine α-ketoglutarate transaminase, in rat liver and Hepatoma 5123. Pitot and Morris, 1009

Ultrastructure, of Yoshida ascites hepatoma. Bairati, 989

Uracil, carbon dioxide-sparing effect of, in Jensen and JA sarcomas *in vitro*. McCoy, Maxwell, and Kruse, 997

Ureidosuccinic acid-C^{14}, utilization for pyrimidine synthesis in rat tissues after amethopterin administration. Eidinoff, Knoll, Marano, and Klein, 1377

Urethan, influence on spontaneous leukemia and on induction of hemangiomas in mice. Kawamoto, Kirschbaum, Ibanez, Trentin, and Taylor, 71
——, multipotential carcinogenesis with, in hamster. Toth, Tomatis, and Shubik, 1537
——, tested for effect on nucleic acid pyrimidine synthesis in rat tissues. Eidinoff, Knoll, Marano, and Klein, 1377
——, with x-rays or estrogen, leukemogenic effect of, in mice, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309

Uricase, in rat liver, inhibited by 6-chlorouric acid *in vitro*. Duggan, Weigert, and Titus, 1047

Uridine, incorporation into nucleic acids of leukemic cells in culture. Pasternak, Fischer, and Handschumacher, 110

Uridine-5′-phosphate, inhibition of carbamyl phosphate-aspartate transcarbamylase in Ehrlich ascites cells by. Bresnick and Hitchings, 105

Urinary bladder, damaged in rats and dogs by cyclophosphamide. Philips, Sternberg, Cronin, and Vidal, 1577
——, tumor induced in hamsters with *o*-aminoazotoluene. Tomatis, Della Porta, and Shubik, 1513

Urinary metabolites, of *N*-2-fluorenylacetamide, chromatography of. Weisburger, Grantham, Morris, and Weisburger, 949

V_2 carcinoma, passage of cells of, through capillaries in rabbits. Zeidman, 38
——, rabbit, adhesiveness and stickiness of cell surface of. Coman, 1436

Vaccinia hemagglutinin, inhibitor of, in ascites of Ehrlich carcinoma of mouse. Wolin, 1030

Variability, physiological, genetic aspects of. Wolff, 1119

Vincaleukoblastine, effect on dividing cells *in vivo*. Cutts, 168
——, stathmokinetic effect on normal bone marrow and leukemic cells. Cardinali, Cardinali, and Blair, 1542

Viral carcinogenesis, cell differentiation as determinant of susceptibility to, symposium paper. Kaplan, 981
——, symposium paper. Dulbecco, 975

Virus, Moloney, lymphoid leukemia induced with, response to drug therapy. Chirigos, Moloney, Humphreys, Mantel, and Goldin, 803
——, vaccinia, hemagglutinin inhibitor, in ascites of Ehrlich carcinoma. Wolin, 1030

Viruses, tumor, effect on cell behavior, symposium. Rubin, 1244

Virus-induced tumors, polyoma, in mice, transplantation of. Sjögren, Hellström, and Klein, 329

Virus-like particles, in association with L strain cells. Dales and Howatson, 193

Vitamin, antagonist of, clinical experience with 6-aminonicotinamide. Herter, Weissman, Thompson, Hyman, and Martin, 31

Wagner, osteogenic sarcoma, antitumor activity of cytoxan against, in mouse. Sugiura, Schmid, and Schmid, 1412
——, mouse, transplantability after frozen storage. Sugiura, 496

Walker carcinosarcoma 256, amino acid and protein metabolism in cell cultures of. Green and Miller, 1034
——, antitumor activity of cytoxan against, in rat. Sugiura, Schmid, and Schmid, 1412
——, antitumor effect of psicofuranine on rats bearing. Magee and Eberts, 611
——, effect of hyperlipemia on pulmonary metastases of, in rat. Clifton, Agostino, and Minde, 1062
——, effect of reticuloendothelial interference on hepatic metases of. Fisher and Fisher, 275
——, electron microscopic, histologic, and histochemical features of, indicating it to be carcinoma. Fisher and Fisher, 527
——, electron microscopic study of. Mercer and Easty, 52
——, glutamic-oxalacetic transaminase activity of, in rat. Dyer, Gullino, Ensfield, and Morris, 1522
——, growth and transaminase activity of, effect of cortisol on. Rosen, Budnick, Solomon, and Nichol, 620

Walker carcinosarcoma 256—*Continued*
——, metabolism of radioactive albumin in rats bearing. Busch, Fujiwara, and Firszt, 371
——, nonspecificity of hexokinase for glucose in preparations from. Lange and Kohn, 1055
——, normal rabbit serum cytotoxic for, in tissue culture. Tuttle and Foushee, 735
——, phosphorylation in normal and neoplastic mitochondria, in rat. Aisenberg, 304
——, rat, effect of implant cell numbers on takes of, and inhibitory effect of guinea pig serum on. Kwak, Jameson, Ryan, and Kurtz, 44
——, rat, respiration in mitochondria and homogenate of. Aisenberg, 295
——, rat, transplantability after frozen storage. Sugiura, 496
——, thymidine incorporation and DNA content of slices of. Aisenberg, 1560

Warburg's theory, data in contradiction to, on lymphoblasts *in vitro*. Homburg, Bos, deBruyn, and Emmelot, 353

Water, retention by normal and tumor-bearing rats. Rechcigl, Grantham, and Greenfield, 238

Weight loss, host, relation to false positives in evaluation of anticancer agents. Laster, Schabel, Skipper, Wilcox, and Thomson, 895

Xanthine-8-C^{14}, anabolism and catabolism of, by minced neoplasms and minced tissues of rats and mice. Wheeler and Alexander, 399
——, metabolism in various rat and mouse tissues *in vivo*. Wheeler and Alexander, 390

Xanthine oxidase, in rat liver, inhibited by 6-chloropurine *in vitro*. Duggan, Weigert, and Titus, 1047

X-radiation. *See also* Irradiation and Radiation.
——, effect on differentiation of human embryonal carcinoma. Midgley and Pierce, 545
——, effect on nucleic acid biosynthesis in mouse leukemia. Trams, Nadkarni, and Smith, 567
——, leukemogenic effect of, in mice, influence of colchicine on. Kawamoto, Kirschbaum, Trentin, and Taylor, 309
——, mammotropic pituitary tumors induced in rodents by. Yokoro, Furth, and Haran-Ghera, 178
——, of PK cells, effect on chromosome variations. Ruddle, 885
——, of thyroid gland, in induction of neoplasms in the rat. Lindsay, Sheline, Potter, and Chaikoff, 9

Yoshida ascites hepatoma, electron microscopy of cells of. Bairati, 989

Yoshida hepatoma AH 130. *See* Yoshida ascites hepatoma.

Zinc, histochemical analysis of, in spontaneous and induced primary tumors in rats. Arnold and Sasse, 761
